## Colder with Rain Chances Next Week

February 8, 2025

3:38 AM

### What We Know

- Cold front will move through Saturday/early Sunday, and be reinforced on Tuesday, bringing colder temperatures for next week.
- Rain chances generally Monday through Tuesday night, with best chances during the day Tuesday. Rain amounts look to generally stay on the lighter side.

### What We're Watching

- Exactly how cold air will be behind the front (leading to high uncertainty in Sunday's highs).
- Precipitation type. Right now, it looks like primarily rain, but there is a low chance (<30%) of freezing rain north of Interstate 20 Tuesday night.

National Weather Service  
San Angelo  
[weather.gov/SJT](https://weather.gov/SJT)

**A cold front this weekend will bring cooler conditions starting Sunday. We do have on-and-off rain chances Monday through Wednesday, with the possibility of a few thunderstorms Monday night. Right now, precipitation looks mostly liquid, but there is a low chance (30% or less) that the Big Country could see some freezing rain Wednesday morning. We will continue to monitor the potential for winter precipitation as we go into next week.**
