Updated: 3:00 AM CST, February 26th, 2025

A windy pattern returns this weekend into next week with an increased fire danger.

The combination of northeasterly winds between 15-25 mph and gusts to 35-40 mph, and relative humidity values as low as 20 percent, will lead elevated fire weather conditions area-wide as fuels continue to dry out. A Fire Danger Statement is in effect from noon through 7 PM CST today.

Hazardous Weather

Elevated Fire Danger Today

February 26, 2025
3:58 AM

Late this morning through early evening

Southern Permian Basin, Trans Pecos, Guadalupe/Davis Mountains, Marfa Plateau, and northern Big Bend region

RELATIVE HUMIDITY
As low as **5-15%**

WINDS
Shifting to the north/northeast at **10-20 mph** with a few gusts up to 30-35 mph

PLAN >>> **PREPARE** >>> **ACT**

Properly dispose of cigarettes

Secure loose chains and don't let them drag while you drive

If you see smoke or a fire, report it immediately

Obey any burn bans in effect for your location

[f](#) [t](#) [v](#) @NWSNorman

weather.gov/norman

Elevated fire danger is expected across many areas along and west of the Trans Pecos, including the Guadalupe and Davis Mountains, Marfa Plateau, and portions of the Big Bend region today given the combination of very low relative humidity and shift changes in the winds. If you see smoke or a fire, report it immediately!

Multiple afternoons with fire weather danger are evident over the coming week.
