Hazardous Weather

There is now a Marginal Risk (level 1 out of 5) for the entire forecast area today, as a frontal system moves south into a moist and unstable air mass. Damaging winds and large hail will be the main concerns with any storms that develop.

Watching the eastern Panhandles for severe thunderstorm chances on Saturday. Large hail and damaging wind gusts will be the main threats. Check back for updates to the forecast.

Hazardous Weather

Rain Chances Return through the Weekend

weather.gov/ElPaso
Updated: Wed May 28, 2025 2:35 PM

The combination of low-level flow from the east, and mid-level flow from the south, with bring enhanced moisture to the Borderland starting Friday, and remaining through at least Sunday. Chances for scattered showers and thunderstorms will increase through the period, ramping up for the lowlands this weekend.

Updated: Fri May 30, 2025 2:54 AM

Areas east of the Rio Grande have had moisture, resulting in showers and storms for both WED and THU, but the rest of the region has been dry. That will change overnight into Friday morning, as increased east winds, spreads that moisture west. That means more areas, west of the Rio Grande Valley, will get in on the development of showers and thunderstorms Friday through the weekend.

Watching the eastern Panhandles for severe thunderstorm chances on Saturday. Large hail and damaging wind gusts will be the main threats. Check back for updates to the forecast.
