→ Have a severe weather safety plan ready.

National Weather Service | Norman, Oklahoma

@NWSNorman weather.gov/norman

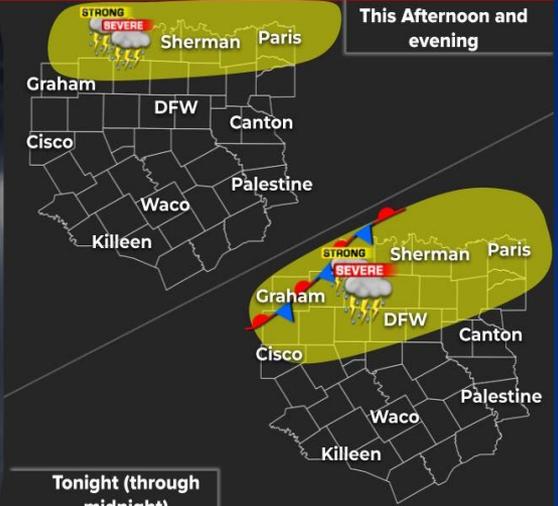

Potential for Storms: Wednesday

weather.gov/FWD
Issued Wed Jun 18, 2025 6:41 AM

A few storms may develop this afternoon & evening mainly along the Red River.

A slow moving cold front will bring another chance of storms tonight.

Hazards:

NATIONAL WEATHER SERVICE FORT WORTH TX
Follow: @NWSFortWorth

Strong to severe thunderstorms are possible Wednesday afternoon through the evening, posing a risk for damaging wind gusts and large hail.

A few storms are expected to develop along the Red River this afternoon and push into portions of North Texas this evening as a cold front approaches from the north. Some may become strong to severe with hail and isolated damaging wind gusts as the main hazards. The best storm chances will be for areas generally along and north of I-20.

Hazardous Weather

Severe Weather Threat Today

Have Multiple Ways to Get Severe Weather Warnings
Latest info at weather.gov/shv

Level 2 of 5: Northern Half of the Four State Region

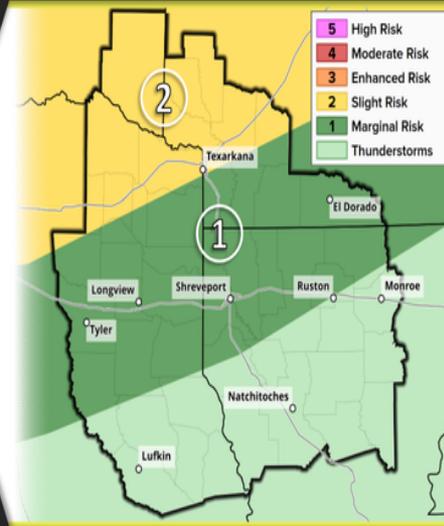

Today through this Evening

Highest Risk for Strong to Severe Storms over Northeast TX, Southeast OK, Southwest AR, and Northwest LA.

Potential Hazards:

- Damaging wind gusts of 60 + MPH
- Large hail of quarter size or larger

Isolated to scattered thunderstorms may develop in the Big Country this evening into early Thursday morning, with an isolated storm possible farther south. If storms can develop, there would be a potential for large hail (around quarter size) and winds 55-60 mph.

NWS Midland/Odessa

What is Major HeatRisk?

extreme

3 - major

moderate

minor

little/none

Major HeatRisk is the 3rd of 4 levels of HeatRisk

What it means:

- Major Risk of heat-related illnesses for much of the population - especially those without effective cooling or hydration.
- Little to no relief at night - air conditioning is necessary - fans and open windows at night will not be enough.

Actions to take:

- Drink plenty of water
- Wear lightweight, light-colored clothing
- Avoid outdoor activities during the warmest parts of the day
- Stay in an air conditioned location, especially during the day

weather.gov/midland
National Weather Service • Midland/Odessa
Updated: June 17, 2025

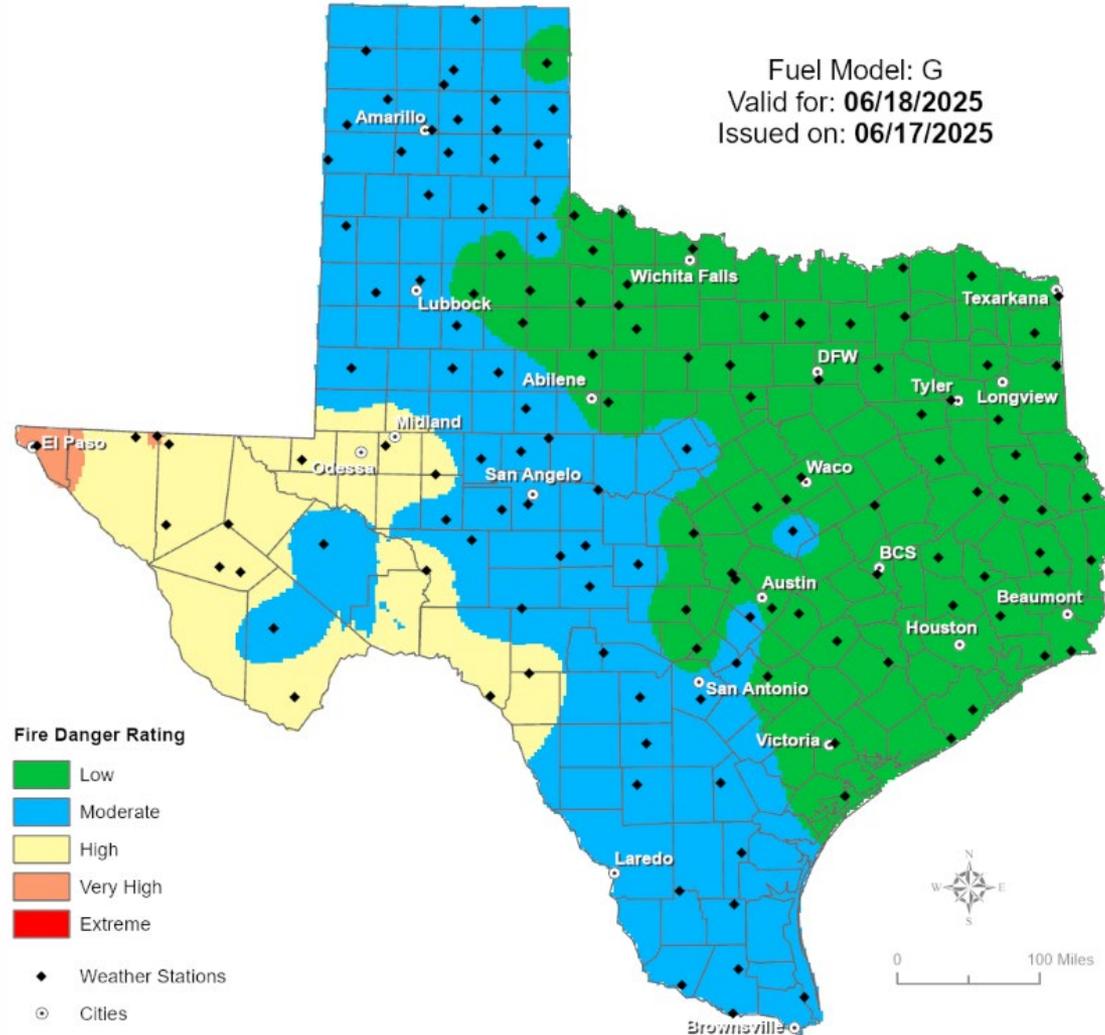

A Level 3 Heat Risk is forecast today for the Rio Grande basins and portions of southernmost and easternmost Permian Basin, as well as more urban areas in the Midland-Odessa area.
