

Texas Division of Emergency Management State Situation Report

Event Name	26-0016 New World Screwworm Response
Date	June 22, 2026
Time	4:00 PM
Reporting Period	2:00 PM June 21, 2026, to 2:00 PM June 22, 2026
Report Number	16

TDEM Regions Affected	6, 7
Disaster Districts Activated	18, 24

STATEWIDE CURRENT SITUATION: The Texas Animal Health Commission (TAHC) continued New World Screwworm response efforts by conducting movement inspections from infested zones, providing outreach and education to stakeholders, and verifying compliance with established movement and biosecurity guidelines to help prevent disease spread.

Texas Parks and Wildlife Department (TPWD) continues to support the New World Screwworm response through stakeholder outreach, wildlife surveillance, and public education efforts to enhance awareness, early detection, and response capabilities across affected and at-risk areas.

Texas A&M AgriLife continues to support New World Screwworm preparedness through its online livestock inspection training program and coordinated public information efforts, including staffing support at the Joint Information Center within the State Operations Center.

The Texas Department of State Health Services (DSHS) continues to engage in response efforts following the new case confirmations from the weekend and continues to monitor. DSHS is actively engaging local stakeholders to increase awareness, support surveillance efforts, and promote preparedness and response activities in the affected area.

On June 19, Governor Greg Abbott announced the launch of an enhanced website that offers comprehensive information for Texans related to the New World Screwworm (NWS). Located in TDEM's Disaster Portal, Texans can visit screwworm.texas.gov to access a "one-stop shop" of information and resources from state agency partners engaged in NWS response.

State agencies are working closely with local, state, and federal partners in the field and at the State Emergency Operations Center. State partners have contacted thousands of landowners and stakeholders and remain engaged and prepared to support response operations as efforts continue to prevent further spread of NWS.

On June 8, Governor Abbott directed TDEM to activate the Texas State Emergency Operations Center to Level II (Escalated Response) to support the state's New World Screwworm response operations.

Resources from multiple state agency partners and the U.S. Department of Agriculture (USDA) are being leveraged in response to this parasite detection.

On June 5, following confirmation of NWS detection in Texas, Gov. Abbott received a briefing and provided an update to Texans on the state's response at the Texas State Emergency Operations Center. The Governor also issued an updated state disaster declaration to address NWS and prioritize operations in Uvalde and Zavala counties.

On January 26, Gov. Abbott issued a statewide disaster declaration certifying that the spread of NWS threatened Texas's livestock industry and economy and posed an imminent threat of widespread and severe property damage for all Texas counties. The declaration also authorized the use of all available resources of the state government to cope with this disaster and allowed for the allocation of state resources to address the spread of the parasite to the Texas NWS response team.

On June 25, 2025, Gov. Abbott directed the Texas Animal Health Commission and Texas Parks and Wildlife Department to establish a joint Texas New World Screwworm Response Team to lead the state's prevention and response efforts.

For more than 18 months since being informed of a positive case of NWS in Mexico, the USDA has been working to combat the impacts in coordination with state and local

partners. Such measures by the USDA include importing and dispersing sterile flies in South Texas, outreach with local producers, and building a facility to assist with sterile fly operations.

The Texas Emergency Management Council continues to monitor developments.

OPERATIONAL PRIORITIES:

- Protect life and property.
- Support rapid & effective response.
- Collect and disseminate accurate incident information to improve decision-making.
- Accurately track incident costs associated with assigned resources for cost recovery.

Region 6 (Includes DDs 17, 18, and 24)

Region 6 has contacted every County Judge in the region regarding the outbreak, status, and anticipated future briefings.

Region 6 is coordinating and communicating with local officials and state and federal partners. Currently, personnel are assisting with the needs of the unified command post located in Eagle Pass.

DD 18 – New Braunfels (Includes Atascosa, Bandera, Bexar, Comal, Frio, Gillespie, Guadalupe, Karnes, Kendall, Kerr, McMullen, Medina, and Wilson Counties): Disaster District Emergency Operations Center (DDEOC) 18 is activated to Level III (Increased Readiness Conditions).

DD 24 – Del Rio (Includes Dimmit, Edwards, La Salle, Kinney, Maverick, Real, Uvalde, Val Verde, and Zavala Counties): DDEOC 24 is activated to Level III (Increased Readiness Conditions).

RESPONDING STATE AGENCIES/ORGANIZATIONS REPORTS

Texas Division of Emergency Management (TDEM):

On June 8, the State Operations Center (SOC) activated to Level II (Escalated Response) in support of the New World Screwworm incident. The SOC continues directing interagency coordination to maintain unified communication, deploy necessary resources, and support response operations in affected regions across Texas.

Texas Animal Health Commission (TAHC):

NWS Statistics

as of 6/22/26 at 2:00 pm:

Total Confirmed Cases in Texas: 14

Counties affected	Total positive cases	Species affected
Zavala	2	cattle
La Salle	2	cattle
Gillespie	1	goats
Edwards	5 (+2)	cattle, goats
Tom Green	1	cattle
Crockett	1	sheep
Counties affected	Total inactive cases	Species affected
Zavala	1	cattle
Sutton	1	sheep
Total Confirmed Cases	14	

NWS Certified Inspector Program Statistics

As of 6/22/26 at 2:00 PM

Attempted Final Exam	213
Passed Final Exam	205
Application in Process	8
Certified Inspectors	242 (+12)

**TAHC expanded eligible applicants to include emergency management personnel. As the program rolls out, TAHC is evaluating expansion of the program to additional groups.*

On the evening of June 21, 2026, the TAHC posted a new infested zone due to the detection of NWS on a sheep in Crockett County.

Mission Information and Details

June 22

- To date, TAHC has inspected 7,023 animals in the infested zones, and 114 certificates have been issued for movement out of the infested zones.
- Five (5) groups of TAHC inspectors have been mobilized to conduct animal inspection/movement/outreach within the identified infested and adjacent zones. These groups will support movement inspections and issue movement certificates as quickly as possible for continuity of business, as they are requested and scheduled by the ICP.
 - Yesterday, June 21, a total of 15 inspections were completed for movement out of the infested zones.
- Nine (9) compliance and checkpoint strike teams are operating roadside checkpoints. Roadside checkpoints have been established within the infested and adjacent zones to ensure NWS guideline compliance.
 - Yesterday, June 21, a total of 27 stops were completed; 18 stops provided for education/outreach, and 18 verified NWS guideline compliance.
- TAHC Regional Staff are working with local producers in the region to answer questions and assist with the coordination of local jurisdictions and assets.
- NWS Identification Specialists, located at the NVSL Mobile Lab and USDA Agricultural Research Service (ARS) Lab, are screening suspect larval and fly submissions from the infested and adjacent zones for rapid identification. One (1) TAHC entomologist has been assigned to the mobile laboratory to assist.
- Providing information, outreach, and education to industry, animal owners, stakeholders, and the public about NWS to encourage surveillance and proper reporting.
- The TAHC New World screwworms webpage is updated regularly to provide information and resources, as it becomes available.

The situation is evolving, and new information will be provided as investigations continue.

Executive Director Orders identifying Infested Zones remain in effect, pursuant to Texas Agriculture Code, Chapters 161 – 168, and applicable regulations found in Title 4 of the Texas Administrative Code, Part 2, Chapters 31-60. This order remains in effect until the quarantine is released by the Commission.

Texas Parks and Wildlife Department (TPWD):

To protect the State's natural resources, including fish and wildlife, through land-based and marine patrol, TPWD will serve as a force multiplier responding to requests for support from our federal, state, and local partners to prevent, detect, control, or eradicate parasitic disease outbreaks. TPWD will deploy coordinated resources to prevent, detect, control, and eradicate parasitic disease within the Texas-Mexico Border region.

TPWD staff will continue to coordinate native wildlife surveillance efforts, which will include:

- Working with landowners to organize active wildlife surveillance on their properties
- Inspection of hunter-harvested carcasses when necessary, including animals harvested in State Parks and Wildlife Management Areas.
- Inspection of recently road-killed wildlife.
- Inspection of animals is handled as part of routine wildlife handling, whether that is by agencies, researchers, or other entities that encounter wildlife on a regular basis.
- Reporting from wildlife rehabbers, private practice vets, law enforcement, taxidermists, game processors, and the public.

June 22

- TPWD Staff have contacted 4,617 TPWD cooperators and permit holders by phone to notify them of the NWS infestations and promote surveillance.
- In addition to cooperators located in a zone, TPWD staff are also contacting all available TPWD cooperators that are currently not in a zone in South Texas and the Edwards Plateau. As of this report, 2,842 TPWD cooperators on that list have been contacted.
- TPWD staff will begin contacting the 101 cooperators in the newly established Crockett 01 infested and surveillance zones today. There were no Deer Breeders or Wildlife Rehabilitators identified within the new zones. Crockett 01 covers portions of Crockett, Schleicher, Sutton, and Val Verde counties.
- TPWD staff are monitoring 51 game cameras in 4 state parks. San Angelo State Park is monitoring 5 game cameras, and an additional 46 cameras at Hueco Tanks, Kickapoo, and Franklin Mountains.
- Since NWS was detected in Texas, TPWD staff have presented on NWS at 10 workshops, totaling approximately 1,765 attendees.

As of June 21

- TPWD staff have investigated 2,217 animals statewide and investigated 30 suspect cases.
- TPWD staff are monitoring 295 game cameras in 30 Wildlife Management Areas. TPWD's Kerr Wildlife Management Area is located within the Gillespie County Surveillance Zone and is monitoring 9 game cameras, and the Chaparral Wildlife Management Area is monitoring 7 game cameras for signs of NWS infestations on the property. In addition to those, San Angelo State Park is monitoring 5 game cameras.

As of June 19

- TPWD staff have actively secured 61 NWS traps and 22 Ground Release Chambers locations by contacting TPWD, cooperating with landowners at the request of TAHC and USDA.
- TPWD Wildlife veterinarians and Wildlife Health Specialists have provided NWS presentations, refresher courses, sample collection training, and SOP overview to 351 TPWD Wildlife staff, 386 TPWD LE, and 76 State Park attendees.

Texas A&M AgriLife Extension Service (AgriLife):

Currently, the AgriLife Extension SOC liaison, Public Information Officer (PIO), Disaster Assessment and Recovery (DAR) Team Members, DAR Administration, Extension Administration, and County Extension Agents are monitoring NWS movement and conditions, SOC response activity, and participating in weekly communication calls with Extension Administration, Entomologists, and Livestock Specialists. Disaster Assessment and Recovery Specialists are on standby to support County Extension Agents and ESF-11 partners with public education, animal response, and recovery efforts as requested. PIO continues to develop educational and outreach materials for publication and continues to participate in daily Joint Information Center activities.

Since June 2025, leading up to the first confirmed NWS case in Texas, AgriLife has:

- Conducted educational programs on NWS reaching over 21,200 participants.
- Established an 18-member working group of Extension Specialists across livestock, wildlife, and human disciplines focused on the development of educational information, outreach techniques, and resources for use by County Extension Agents and other appropriate Extension personnel across Texas.
- Two internal staff NWS webinar trainings completed by 500 AgriLife Extension and AgriLife Research personnel, were conducted with training support from the TAHC and TPWD.
- Hosted a hands-on professional development NWS workshop hosted at the San Antonio Livestock Show Ground for 126 AgriLife Extension and AgriLife

Research personnel. In addition to others in attendance at this workshop, County Extension Agents (CEAs) from 48 of the southern and western Texas Counties were in attendance.

- Developed a County Extension NWS Educational Tool kit, complete with videos and PowerPoint Slide Decks for use in local producer and community educational outreach efforts.
- Through a grant from USDA-APHIS, Texas A&M AgriLife Extension has distributed 1,000 NWS larva collection kits among the Southern and Western County Extension offices for use in NWS detection and identification.
- AgriLife Extension is wrapping up the development of a course that will train people on what to do and expect related to the occurrence of NWS. AgriLife Extension will provide maintenance and management of this course.
- Provided expertise with local and state government representatives to better inform their preparation should an incident occur.
- Texas A&M AgriLife Extension livestock entomology specialist conducted an NWS awareness training during the monthly meeting of the Extension Disaster Education Network (EDEN) Agricultural Committee, as well as more in-depth training during the May 2026 EDEN webinar hosted by the EDEN professional development committee.

June 22

- The NWS Preparedness and Response Education Course for Livestock Inspection is available on the AgriLife Learn educational platform. As of Noon today, 3,080 individuals had enrolled in the course, with 963 completing the modules and earning completion certificates.
- AgriLife has a DAR PIO serving at the Joint Information Center at the SOC.

As of June 19

- The USDA announced the outcome of the NWS Grand Challenge program, where the focus is on developing new tools to aggressively detect, treat, or mitigate the impacts of NWS. Several AgriLife Research scientists were recognized for this challenge.
- 708 new NWS sample kits have been made for distribution.
- AgriLife Leadership testified to the State House Agriculture Committee on efforts associated with AgriLife towards supporting the NWS response, including progress on the inclusion of medicated feed for deer.

Texas A&M Veterinary Medical Diagnostic Laboratory (TVMDL):

The Texas A&M Veterinary Medical Diagnostic Laboratory (TVMDL) has deployed one laboratory professional to the Texas Animal Health Commission's (TAHC) Pleasanton office to join the United States Department of Agriculture mobile detection unit deployed from USDA's National Veterinary Services Laboratory (NVSL). The lab is now operational and accepting samples for identification. A second professional remains stationed in the State Operations Center (SOC) in Austin.

TVMDL is educating clients to contact TAHC for triage of a suspected fly or larvae instead of direct submission to TVMDL. However, TVMDL Client Services staff review every daily submission and flag any cases submitted for fly/larvae ID. Laboratorians who have passed the USDA proficiency test for NWS identification stand ready to review submissions and will immediately contact TAHC and USDA should a suspect case be identified. Suspect samples will be routed as directed by TAHC and USDA.

Staff participate in the TAHC Virtual Joint Information Center daily calls.

Laboratory personnel at all four agency locations are on standby to support ESF-11 partners as needed.

TVMDL veterinarians are assisting the Texas A&M AgriLife Extension Service in producing screwworm collection kits. Talks are ongoing today to secure supplies for more kits.

TVMDL is working to validate high-throughput testing, should the need arise.

June 22

- With support from TVMDL, the NVSL mobile lab reviewed 1 case on June 21, 2026; TVMDL did not receive any new cases at any lab location on June 21, 2026.

As of June 21

- With support from TVMDL, the NVSL mobile lab reviewed 3 cases on June 20, 2026; TVMDL did not receive any new cases at any lab location on June 20, 2026.

As of June 20

- With support from TVMDL, the NVSL mobile lab reviewed 2 cases on June 19, 2026; TVMDL received one case from a private citizen on June 19 at the College Station laboratory location.
- TVMDL communications personnel documented multimedia content of TVMDL staff training efforts at the NVSL Mobile Animal Disease Laboratory (MADL).

Texas Department of State Health Services (DSHS):

DSHS State Medical Operations Center (SMOC) is at Increased Readiness in support of this incident. DSHS continues working with state partners and lead agencies to ensure ESF-8's ongoing support.

There are currently no confirmed human cases of NWS in Texas. DSHS is prepared to support, as needed, to assist in protecting the Texas livestock industry and wildlife. DSHS is ready to respond to human cases, should that occur.

June 22

Ongoing Coordination

- DSHS Public Health Region-9/10 (Odessa and El Paso area)
 - Following confirmation of the new cases from the weekend, Region 9/10 Zoonosis Control is working on reaching out to stakeholders in the area.

As of June 21

Ongoing Coordination

- DSHS Public Health Region 1 (Panhandle)
 - PHR 1 Zoonosis Control continues to share NWS resources as they become available. PHR 1 Zoonosis is advocating the need and necessity of completing the NWS inspector certification training.
 - PHR 1 Zoonosis Control is organizing NWS training for vets. Format and details forthcoming.
 - TPWD, TAHC, and Texas AgriLife have agreed to co-present with DSHS for county judges. Finalizing presenters and a date (tentative date 6/26/26).
- DSHS Public Health Region 8 (San Antonio and Uvalde area)
 - Staff from various programs will attend the Kinney County Commissioners Court on June 22, and will provide an update on NWS.
- DSHS is working with partners on a 10-day notification period waiver to assist with expedition of work on the New World Screwworm Production Facility at Moore Air Base. The Region 11 inspector has been assigned to support this project to ensure compliance with federal NESHAP regulations.

Public Messaging

- DSHS Zoonosis Control Branch will be hosting [2] webinars:
 - "Animal Control Officer (ACO) Training New World Screwworm Response"
 - Tuesday, June 23rd from 10:00 to 11:30 am CST

- 1.5 CEs will be awarded to Animal Control Officers.
- “Operational Response to New World Screwworm”.
 - Webinar will provide a clinical overview and focus on NWS case management in the community, including epidemiological and public health follow-up protocols.
 - Thursday, June 25, 2026 from 12:00 to 1:30 pm CST

As of June 20

Public Messaging

- DSHS has provided factsheets, flyers, reporting aids, and guidance documents to TDEM for upload to screwworm.texas.gov.
- DSHS has updated its website with reporting aids for animal control officers and local health departments and added flyers for agricultural producers, employees, and the general public. Additionally, DSHS is developing a new easy-to-read guide for the public to understand how to report possible cases of NWS.
- DSHS continues working with state agency partners to ensure that information shared about surveillance and reporting is correct and includes the most up-to-date federal and state resources.
- DSHS Public Information Officers continue to participate in Joint Information Center activities.

As of June 19

Food Safety

- Texas Meat Safety Assurance continues to support the livestock industry, actively monitors potential cases of New World Screwworm at slaughter, provide training, and information to stakeholders. Currently:
 - Inspections of every animal continue at state-inspected slaughter establishments, and weekly inspections continue at custom-exempt slaughter facilities.
 - There are 0 inspected establishments and 0 Custom Exempt establishments conducting active slaughter activities in the infested zones, and 3 inspected establishments and 1 Custom Exempt establishments conducting active slaughter activities in all Adjacent Surveillance Zones.
 - DSHS Dairy sanitarians are working closely with permitted dairies to ensure appropriate use and withdrawal times for authorized drugs to treat NWS.
 - Texas currently has 299 Producer Dairies and 56 Retail Raw Dairies.
 - There is 1 Retail Raw Dairy located in Gillespie County.

- Meat Safety personnel are also continuing to engage in education efforts to increase awareness of New World Screwworm. Learning materials, in both Spanish and English, have been distributed to 153 slaughter establishments, and follow-up in-person engagements have been conducted at 136 establishments.

Ongoing Coordination

- DSHS Public Health Region 1 (Panhandle)
 - 5 animal quarantine locations are being visited
- DSHS Public Health Region 4/5N (North Texas/ Piney Woods area)
 - Region 4/5N in collaboration with other regional ZC teams, completing and planning NWS tabletop exercises for ACOs and local stakeholders.
- DSHS Public Health Region 8 (San Antonio and Uvalde area)
 - DSHS Region 8 Zoonosis Control, Preparedness and Response continues outreach and response to stakeholder inquiries.
 - Zoonosis Control staff conducted shelter inspections in Kirby, Bexar County, and the City of San Antonio. NWS outreach provided during inspections.
 - The Zoonosis Control team facilitated submission of samples to the state lab from a Victoria County patient for NWS to rule out. Results were expected on June 18; however, delayed due to shipping, currently low suspicion.
 - Preparedness and Response provided an NWS situation update to health and medical partners at the STRAC Emergency Hospital Disaster Group meeting.
 - Staff from Specialized Health and Social Services and Tx Health Steps programs have provided outreach to wound care centers in Region 8.
 - Comal County, along with Guadalupe County, will host a joint NWS planning meeting on Wednesday, June 24, 2026, at 1:00 pm. TAHC, TPWD, DSHS, and TxAgrilife have been invited to attend and present the current situation.
- DSHS Public Health Region 9/10 (West Texas)
 - Provided training on the current status of NWS, sample submission, and where to locate information and resources to a group of 12 Animal Control Officers.
- Zoonosis Control Branch (ZCB).
 - Animal Control Officer (ACO) Training New World Screwworm (NWS) Response [webinar](#).

- Date: Tuesday, 23 June 2026 from 10 A.M. – 11:30 A.M.
- In preparation for this webinar, the DSHS Zoonosis team is conducting a brief survey of ACOs to identify key training topics to include.

DSHS staff across regional offices continue reaching out to partners to ensure animal control officers, veterinarians, local health departments, county judges, tribal nations, and other regional partners have the latest guidance and resources for identification, sampling, and reporting New World screwworm.

Texas Department of Agriculture (TDA):

The Texas Department of Agriculture continues to conduct surveillance, gather intelligence, collect evidence, and monitor any signs of the New World Screwworm fly in relevant portions of the state. Traps specific for the New World Screwworm have been deployed and are continually monitored, with all suspect samples sent to our state and federal partners for identification of suspect fly species.

Texas Commission on Environmental Quality (TCEQ):

TCEQ continues to closely monitor the New World Screwworm response and will coordinate with state and federal partners to provide technical assistance and guidance on carcass disposal.

Texas Department of Transportation (TxDOT):

TxDOT Emergency Management personnel continue to monitor the situation and support lead state agency partners. TxDOT continues to coordinate with TAHC regarding the increase and extended specialized fly trap locations along state-maintained Right-of-Ways (ROW) in impacted areas. TxDOT continues to coordinate with TAHC regarding compliance checkpoint locations along state-maintained roadways.

Texas Military Department (TMD):

The Texas Military Department (TMD) is supporting state agency partners in response with a SOC support team.

Texas Cyber Command (TXCC):

TXCC is monitoring the situation and stands ready to support the state's response efforts. TXCC is monitoring the situation using cybersecurity tooling and threat intelligence feeds. No cyber threats related to this event have been identified.

Texas Department of Public Safety (DPS):

Texas Department of Public Safety personnel continue to assist the Texas Animal Health Commission by providing a Texas Highway Patrol Trooper to serve as a liaison at the Incident Command Post. Personnel will serve as the region liaison to facilitate coordination efforts. Additionally, area Troopers are conducting patrol operations in and around the affected areas of Zavala, La Salle, Edwards, and Gillespie Counties and remain available to respond to requests for assistance if needed at designated TAHC checkpoints. DPS has assisted TAHC with the transportation of test samples as needed.

Texas A&M Veterinary Emergency Team (VET):

VET has returned from an assigned status in the field to an available status from home stations and remains available on an as-needed basis.

VET's operational area focused on the following counties: Gillespie, Mason, Kimble, Sutton counties, with options for Edwards or Uvalde counties.

Summary animal type statistics of VET activity from 6/14 at noon to 6/18 at noon is in the chart below:

Species	Number in herd	Number inspected/treated
Cattle	1,841	1,399
Goats	2,359	2,154
Sheep	2,117	2,089
Pigs	4	4
Horses	74	53
Cats & Dogs	33	8
Exotics	23	21
Poultry	120	50

FINAL COMMENTS: The State Operations Center (SOC) is currently operating at Level II (Escalated Response Conditions). The Texas Division of Emergency Management (TDEM) continues to monitor the situation and will provide additional situation reports as needed.

The four levels of SOC activation are:

- Level I (Emergency Conditions)
- Level II (Escalated Response Conditions)
- Level III (Increased Readiness Conditions)
- Level IV (Normal Conditions)

This Situation Report can be found on the TDEM webpage at:
