

Texas Division of Emergency Management State Situation Report

Event Name	26-0016 New World Screwworm Response
Date	June 25, 2026
Time	4:00 PM
Reporting Period	2:00 PM June 24, 2026, to 2:00 PM June 25, 2026
Report Number	19

TDEM Regions Affected	6, 7
Disaster Districts Activated	18, 24

STATEWIDE CURRENT SITUATION: The Texas Animal Health Commission continues New World Screwworm response efforts following a detection in Medina County and the establishment of Infested Zone 09. Activities remain focused on movement oversight, compliance verification, and producer outreach to support disease containment and awareness.

Texas Parks and Wildlife Department (TPWD) continues to support NWS response efforts through stakeholder outreach, wildlife surveillance, monitoring activities, and public education. Staff are engaging partners across affected and surrounding areas, investigating potential cases, deploying surveillance resources, and promoting awareness and preparedness through ongoing coordination and outreach efforts statewide.

Texas A&M AgriLife continues to strengthen NWS preparedness and response efforts through training and education initiatives. Course participation remains strong, while

AgriLife subject matter experts are supporting partner agencies with specialized training to enhance inspection, detection, and response capabilities statewide.

The Texas Department of State Health Services (DSHS) continues to support the NWS response through training, outreach, stakeholder engagement, and interagency coordination. Regional staff are providing education and resources to local partners, supporting response activities in affected areas, monitoring new detections, and promoting preparedness through webinars, meetings, and public outreach initiatives.

On June 19, Governor Greg Abbott announced the launch of an enhanced website that offers comprehensive information for Texans related to the New World Screwworm (NWS). Located in TDEM's Disaster Portal, Texans can visit screwworm.texas.gov to access a "one-stop shop" of information and resources from state agency partners engaged in NWS response.

State agencies are working closely with local, state, and federal partners in the field and at the State Emergency Operations Center. State partners have contacted thousands of landowners and stakeholders and remain engaged and prepared to support response operations as efforts continue to prevent further spread of NWS.

On June 8, Governor Abbott directed TDEM to activate the Texas State Emergency Operations Center to Level II (Escalated Response) to support the state's New World Screwworm response operations.

Resources from multiple state agency partners and the U.S. Department of Agriculture (USDA) are being leveraged in response to this parasite detection.

On June 5, following confirmation of NWS detection in Texas, Gov. Abbott received a briefing and provided an update to Texans on the state's response at the Texas State Emergency Operations Center. The Governor also issued an updated state disaster declaration to address NWS and prioritize operations in Uvalde and Zavala counties.

On January 26, Gov. Abbott issued a statewide disaster declaration certifying that the spread of NWS threatened Texas's livestock industry and economy and posed an imminent threat of widespread and severe property damage for all Texas counties. The declaration also authorized the use of all available resources of the state government to cope with this disaster and allowed for the allocation of state resources to address the spread of the parasite to the Texas NWS response team.

On June 25, 2025, Gov. Abbott directed the Texas Animal Health Commission and Texas Parks and Wildlife Department to establish a joint Texas New World Screwworm Response Team to lead the state's prevention and response efforts.

For more than 18 months since being informed of a positive case of NWS in Mexico, the USDA has been working to combat the impacts in coordination with state and local

partners. Such measures by the USDA include importing and dispersing sterile flies in South Texas, outreach with local producers, and building a facility to assist with sterile fly operations.

The Texas Emergency Management Council continues to monitor developments.

OPERATIONAL PRIORITIES:

- Protect life and property.
- Support rapid & effective response.
- Collect and disseminate accurate incident information to improve decision-making.
- Accurately track incident costs associated with assigned resources for cost recovery.

Region 6 (Includes DDs 17, 18, and 24)

Region 6 has contacted every County Judge in the region regarding the outbreak, status, and anticipated future briefings. Region 6 is coordinating and communicating with local officials and state and federal partners. Currently, personnel are assisting with the needs of the unified command post located in Eagle Pass.

DD 18 – New Braunfels (Includes Atascosa, Bandera, Bexar, Comal, Frio, Gillespie, Guadalupe, Karnes, Kendall, Kerr, McMullen, Medina, and Wilson Counties): Disaster District Emergency Operations Center (DDEOC) 18 is activated to Level III (Increased Readiness Conditions).

DD 24 – Del Rio (Includes Dimmit, Edwards, La Salle, Kinney, Maverick, Real, Uvalde, Val Verde, and Zavala Counties): DDEOC 24 is activated to Level III (Increased Readiness Conditions).

RESPONDING STATE AGENCIES/ORGANIZATIONS REPORTS

Texas Division of Emergency Management (TDEM):

On June 8, the State Operations Center (SOC) activated to Level II (Escalated Response) in support of the New World Screwworm incident. The SOC continues

directing interagency coordination to maintain unified communication, deploy necessary resources, and support response operations in affected regions across Texas.

Texas Animal Health Commission (TAHC):

NWS Statistics

as of 6/25/26 at 2:00 pm:

Total Confirmed Cases in Texas: 19

Counties affected	Total positive cases	Species affected
Zavala	2	cattle
La Salle	2	cattle
Gillespie	1	goats
Edwards	5	cattle, goats
Tom Green	1	cattle
Crockett	1	sheep
Terrell	4	cattle, goats
Medina	1	cattle
Counties affected	Total inactive cases	Species affected
Zavala	1	cattle
Sutton	1	sheep

NWS Certified Inspector Program Statistics

As of 6/25/26 at 2:00 PM

Application in Process	10
Certified Inspectors	340 (+37)

**TAHC expanded eligible applicants to include emergency management personnel. As the program rolls out, TAHC is evaluating expansion of the program to additional groups*

June 25

On June 23, NWS was detected in a bovine in Medina County. Due to the detection of NWS in Medina County, the areas of Bandera, Medina, and Uvalde Counties are designated as Infested Zone 09.

Mission Information and Details

- To date, TAHC has inspected 8,022 animals in the infested zones, and 154 certificates have been issued for movement out of the infested zones.
- Five (5) groups of TAHC inspectors have been mobilized to conduct animal inspection/movement/outreach within the identified infested and adjacent zones. These groups will support movement inspections and issue movement certificates as quickly as possible for continuity of business, as they are requested and scheduled by the ICP.
 - On June 24, a total of 10 inspections were completed for movement out of the infested zones.
- Ten (10) compliance and checkpoint strike teams are operating roadside checkpoints. Roadside checkpoints have been established within the infested and adjacent zones to ensure NWS guideline compliance.
 - On June 24, a total of 72 stops were completed; 24 stops provided for education/outreach, and 48 verified NWS guideline compliance.
- TAHC Regional Staff are working with local producers in the region to answer questions and assist with the coordination of local jurisdictions and assets.
- NWS Identification Specialists, located at the NVSL Mobile Lab and USDA Agricultural Research Service (ARS) Lab, are screening suspect larval and fly submissions from the infested and adjacent zones for rapid identification. One (1) TAHC entomologist has been assigned to the mobile laboratory to assist.
- Providing information, outreach, and education to industry, animal owners, stakeholders, and the public about NWS to encourage surveillance and proper reporting.
- The TAHC New World screwworms webpage is updated regularly to provide information and resources, as it becomes available.

The situation is evolving, and new information will be provided as investigations continue.

Executive Director Orders identifying Infested Zones remain in effect, pursuant to Texas Agriculture Code, Chapters 161 – 168, and applicable regulations found in Title 4 of the Texas Administrative Code, Part 2, Chapters 31-60. This order remains in effect until the quarantine is released by the Commission.

Texas Parks and Wildlife Department (TPWD):

To protect the State's natural resources, including fish and wildlife, through land-based and marine patrol, TPWD will serve as a force multiplier responding to requests for support from our federal, state, and local partners to prevent, detect, control, or

eradicate parasitic disease outbreaks. TPWD will deploy coordinated resources to prevent, detect, control, and eradicate parasitic disease within the Texas-Mexico Border region.

TPWD staff will continue to coordinate native wildlife surveillance efforts, which will include:

- Working with landowners to organize active wildlife surveillance on their properties
- Inspection of hunter-harvested carcasses when necessary, including animals harvested in State Parks and Wildlife Management Areas.
- Inspection of recently road-killed wildlife.
- Inspection of animals is handled as part of routine wildlife handling, whether that is by agencies, researchers, or other entities that encounter wildlife on a regular basis.
- Reporting from wildlife rehabbers, private practice vets, law enforcement, taxidermists, game processors, and the public.

June 25

- 1,850 cooperators located inside the Zavala, La Salle, Gillespie, Edwards, Tom Green, Crockett, Terrell and Sutton infested, and surveillance zones have received phone calls and updates on the NWS situation in their area.
- The 59 deer breeder permit holders located inside infested and surveillance zones have been contacted by phone.
- The 11 wildlife rehabilitation permit holders in the infested zones and surveillance zones have been contacted by phone.
- Staff has started contacting remaining cooperators (286) in the Medina County zone. Currently, 129 cooperators within those zones have been contacted.
 - There are 17 (6 in the new infested zones) deer breeders that fall within the Medina surveillance zone and infested zone being contacted today.
 - 1 Wildlife Rehabber is within the new surveillance that is being contacted.
- In addition to cooperators located in a zone, TPWD staff are also contacting all available TPWD cooperators that are currently not in a zone in regions covering South Texas, the Edwards Plateau, and Terrell, Pecos, and Brewster Counties. As of this report, 3,293 TPWD cooperators on that list have been contacted.
- TPWD staff have secured an accumulated total of 73 NWS traps by TPWD staff.
- TPWD staff have investigated 2,593 animals statewide and investigated 34 suspect cases.

- TPWD staff are monitoring 52 game cameras in 4 state parks. San Angelo State Park is monitoring 5 game cameras, and an additional 46 cameras at Hueco Tanks, Kickapoo, and Franklin Mountains.
- Since NWS was detected in Texas, TPWD staff have presented on NWS at 13 workshops totaling approximately 2,183 attendees.

As of June 24

- TPWD Staff have contacted 4,983 TPWD cooperators and permit holders by phone to notify them of the NWS infestations and promote surveillance.
- TPWD staff have secured an additional 7 NWS trap locations at the request of TAHC and USDA, with an accumulated total of 73 NWS traps and 22 Ground Release Chambers secured by TPWD staff.
- TPWD staff are monitoring 327 game cameras in 31 Wildlife Management Areas. TPWD's Kerr Wildlife Management Area is located within the Gillespie County Surveillance Zone and is monitoring 9 game cameras, and the Chaparral Wildlife Management Area is monitoring 7 game cameras for signs of NWS infestations on the property.

Texas A&M AgriLife Extension Service (AgriLife):

Currently, the AgriLife Extension SOC liaison, Public Information Officer (PIO), Disaster Assessment and Recovery (DAR) Team Members, DAR Administration, Extension Administration, and County Extension Agents are monitoring NWS movement and conditions, SOC response activity, and participating in weekly communication calls with Extension Administration, Entomologists, and Livestock Specialists. Disaster Assessment and Recovery Specialists are on standby to support County Extension Agents and ESF-11 partners with public education, animal response, and recovery efforts as requested. PIO continues to develop educational and outreach materials for publication and continues to participate in daily Joint Information Center activities.

Since June 2025, leading up to the first confirmed NWS case in Texas, AgriLife has:

- Conducted educational programs on NWS reaching over 21,200 participants.
- Established an 18-member working group of Extension Specialists across livestock, wildlife, and human disciplines focused on the development of educational information, outreach techniques, and resources for use by County Extension Agents and other appropriate Extension personnel across Texas.
- Two internal staff NWS webinar trainings completed by 500 AgriLife Extension and AgriLife Research personnel, were conducted with training support from the TAHC and TPWD.
- Hosted a hands-on professional development NWS workshop hosted at the San Antonio Livestock Show Ground for 126 AgriLife Extension and AgriLife

Research personnel. In addition to others in attendance at this workshop, County Extension Agents (CEAs) from 48 of the southern and western Texas Counties were in attendance.

- Developed a County Extension NWS Educational Tool kit, complete with videos and PowerPoint Slide Decks for use in local producer and community educational outreach efforts.
- Through a grant from USDA-APHIS, Texas A&M AgriLife Extension has distributed 1,000 NWS larva collection kits among the Southern and Western County Extension offices for use in NWS detection and identification.
- AgriLife Extension is wrapping up the development of a course that will train people on what to do and expect related to the occurrence of NWS. AgriLife Extension will provide maintenance and management of this course.
- Provided expertise with local and state government representatives to better inform their preparation should an incident occur.
- Texas A&M AgriLife Extension livestock entomology specialist conducted an NWS awareness training during the monthly meeting of the Extension Disaster Education Network (EDEN) Agricultural Committee, as well as more in-depth training during the May 2026 EDEN webinar hosted by the EDEN professional development committee.

June 25

- The NWS Preparedness and Response Education Course for Livestock Inspection is available on the AgriLife Learn educational platform. As of 11:00 AM, 3,704 individuals are enrolled in the course, with 1,321 having completed the modules and earning completion certificates.
- AgriLife staff participated in Texas Department of State Health Services (DSHS) training for animal control officers on June 23. The training focused on New World Screwworm inspection and response.

As of June 24

- AgriLife Extension personnel continued New World Screwworm outreach efforts through county meetings, informational events, and multi-county trainings across Medina, Stephens, Comanche, Runnels, Brown, Coleman, Callahan, and Shackelford Counties. These efforts continue to increase awareness of New World Screwworm identification, monitoring, and response procedures.

Texas A&M Veterinary Medical Diagnostic Laboratory (TVMDL):

The Texas A&M Veterinary Medical Diagnostic Laboratory (TVMDL) has deployed one laboratory professional to the Texas Animal Health Commission's (TAHC) Pleasanton office to join the United States Department of Agriculture mobile detection unit deployed from USDA's National Veterinary Services Laboratory (NVSL). The lab is now

operational and accepting samples for identification. A second professional remains stationed in the State Operations Center (SOC) in Austin.

TVMDL is educating clients to contact TAHC for triage of a suspected fly or larvae instead of direct submission to TVMDL. However, TVMDL Client Services staff review every daily submission and flag any cases submitted for fly/larvae ID. Laboratorians who have passed the USDA proficiency test for NWS identification stand ready to review submissions and will immediately contact TAHC and USDA should a suspect case be identified. Suspect samples will be routed as directed by TAHC and USDA.

Staff participate in the TAHC Virtual Joint Information Center daily calls.

Laboratory personnel at all four agency locations are on standby to support ESF-11 partners as needed.

TVMDL veterinarians are assisting the Texas A&M AgriLife Extension Service in producing screwworm collection kits. Talks are ongoing today to secure supplies for more kits.

TVMDL is working to validate high-throughput testing, should the need arise.

June 25

- With support from TVMDL, the NVSL mobile lab reviewed 1 case on June 24, 2026; TVMDL did not receive any new cases at any lab location on June 24, 2026.

As of June 24

- With support from TVMDL, the NVSL mobile lab reviewed 5 cases on June 23, 2026; TVMDL did not receive any new cases at any lab location on June 23, 2026.

As of June 20

- TVMDL communications personnel documented multimedia content of TVMDL staff training efforts at the NVSL Mobile Animal Disease Laboratory (MADL).

Texas Department of State Health Services (DSHS):

DSHS State Medical Operations Center (SMOC) is at Increased Readiness in support of this incident. DSHS continues working with state partners and lead agencies to ensure ESF-8's ongoing support.

There are currently no confirmed human cases of NWS in Texas. DSHS is prepared to

support, as needed, to assist in protecting the Texas livestock industry and wildlife. DSHS is ready to respond to human cases, should that occur.

June 25- Ongoing Coordination:

- DSHS Public Health Region- 1
 - PHR 1 Zoonosis is advocating the need and necessity of completing the NWS inspector certification training.
- DSHS Public Health Region - 6/5S
 - Promoted and assisted registering LHD partners for the DSHS Local Health Department NWS Training Webinar
 - Outreach to Infection Control professionals in medical facilities providing reporting, submission, and clinician resources.
- DSHS Public Health Region - 7
 - The PHR 7 Zoonosis Program provided education on NWS to 22 Animal Control Officers (ACO) and Local Health Department staff during an ACO Basic Training Course on 6/24/26.
- DSHS Public Health Region - 8
 - Region 8 Staff attended Commissioner Courts in Dimmit and Calhoun Counties to provide NWS outreach and respond to inquiries from county officials. Laminated TPWD guidance posters were handed out at Dimmit Court by request.
 - Preparedness, Zoonosis and Regional Director provided NWS update at Comal/Guadalupe EOC meeting.
 - NWS outreach provided to animal control contacts and 6 NWS testing kits provided to:
 - Port Lavaca Animal Control, Bayfront Animal Hospital
 - Edna Animal Control
 - City of New Braunfels Animal Control
 - City of Cibola Animal Control
 - Comal County Animal Control
 - City of Seguin Animal Control
 - Following reported Medina County case, Zoonosis staff will visit with ACOs and LHD in Medina County for additional outreach and to provide testing kits 6/25/2026.
- DSHS Public Health Region – 9/10
 - Region 9/10 Zoonosis Control provided information via virtual presentation to Local Health Department Lead Epidemiologists in Region 9/10 on NWS current situation and response as well as sample submission and case investigation guidelines.

- DSHS Public Health Region - 11
 - Planned future events include
 - Starr County Public Educational Forum (June 30th 2026): Hosted by Starr County, South Texas College, TAHC, and DSHS South Texas in Rio Grande City, TX. Focused on community-wide safeguarding measures and the agricultural impacts of NWS for local farmers and ranchers.
 - NWS Training for ACOs & Sanitarians (July 17th 2026): Hosted by the City of Edinburg and Hidalgo County Health & Human Services Department in Edinburg, TX.

Public Messaging as of June 24:

- DSHS shared New World screwworm flyers, fact sheets, and reporting aids with all Texas regional and local public health entity leaders and local health authorities. These resources are available in both English and Spanish.
- DSHS has uploaded factsheets, flyers, reporting aids, and guidance documents to the agency NWS Websites at www.dshs.texas.gov/newworldscrewworm. Spanish version www.dshs.texas.gov/es/gusano-barrenador.
- DSHS Zoonosis Control Branch will be hosting a webinar, “Operational Response to New World Screwworm” on Thursday, June 25 from 12 pm to 1:30 pm. The webinar will provide a clinical overview and focus on NWS case management in the community, including epidemiological and public health follow-up protocols. The intended audience is local health departments and public health partners. Invitations have been sent to Local Health Departments.

DSHS staff across regional offices continue reaching out to partners to ensure animal control officers, veterinarians, local health departments, county judges, tribal nations, and other regional partners have the latest guidance and resources for identification, sampling, and reporting New World screwworm.

Texas Department of Agriculture (TDA):

The Texas Department of Agriculture continues to conduct surveillance, gather intelligence, collect evidence, and monitor any signs of the New World Screwworm fly in relevant portions of the state. Traps specific for the New World Screwworm have been deployed and are continually monitored, with all suspect samples sent to our state and federal partners for identification of suspect fly species.

Texas Commission on Environmental Quality (TCEQ):

TCEQ continues to closely monitor the New World Screwworm response and will coordinate with state and federal partners to provide technical assistance and guidance on carcass disposal.

Texas Department of Transportation (TxDOT):

TxDOT Emergency Management personnel continue to monitor the situation and support lead state agency partners. TxDOT continues to coordinate with TAHC regarding the increase and extended specialized fly trap locations along state-maintained Right-of-Ways (ROW) in impacted areas. TxDOT continues to coordinate with TAHC regarding compliance checkpoint locations along state-maintained roadways.

Texas Military Department (TMD):

The Texas Military Department (TMD) is supporting state agency partners in response with a SOC support team.

Texas Cyber Command (TXCC):

TXCC is monitoring the situation and stands ready to support the state's response efforts. TXCC is monitoring the situation using cybersecurity tooling and threat intelligence feeds. No cyber threats related to this event have been identified.

Texas Department of Public Safety (DPS):

Texas Department of Public Safety personnel continue to support the Texas Animal Health Commission by assigning a Texas Highway Patrol Trooper to serve as a liaison at the Incident Command Post. This individual also serves as a regional point of contact to help coordinate ongoing response efforts.

In addition, Troopers are actively patrolling in and around the impacted areas of Zavala, La Salle, Edwards, and Gillespie Counties, and remain available to respond to assistance requests at designated TAHC checkpoints as needed. DPS personnel have also provided support to TAHC by transporting test samples when required.

Texas A&M Veterinary Emergency Team (VET):

VET has returned from an assigned status in the field to an available status from home stations and remains available on an as-needed basis.

VET's operational area focused on the following counties: Gillespie, Mason, Kimble, Sutton counties, with options for Edwards or Uvalde counties.

Summary animal type statistics of VET activity from 6/14 at noon to 6/18 at noon is in the chart below:

Species	Number in herd	Number inspected/treated
Cattle	1,841	1,399
Goats	2,359	2,154
Sheep	2,117	2,089
Pigs	4	4
Horses	74	53
Cats & Dogs	33	8
Exotics	23	21
Poultry	120	50

FINAL COMMENTS: The State Operations Center (SOC) is currently operating at Level II (Escalated Response Conditions). The Texas Division of Emergency Management (TDEM) continues to monitor the situation and will provide additional situation reports as needed.

The four levels of SOC activation are:

- Level I (Emergency Conditions)
- Level II (Escalated Response Conditions)
- Level III (Increased Readiness Conditions)
- Level IV (Normal Conditions)

This Situation Report can be found on the TDEM webpage at:
