FEMA Region 6 Weather Threat Briefing

Saturday, June 27, 2026

Disclaimer: The purpose of this briefing is to provide a **Regional** weather threat assessment and is meant as a general overview. County/Parish decision makers should consult their local NWS forecast offices for the latest detailed, local weather information. To find your local NWS forecast office, go to www.weather.gov/srh.

National Oceanic and
Atmospheric Administration
U.S. Department of Commerce

National Weather Service
Sector 2 - Texas, Gulf Coast, and Puerto Rico

Summary

- **Flash Flooding:**
 - Slight risk (level 2 of 4) today across NE AR, with a Marginal risk (level 1 of 4) across NE OK and N AR.
 - Marginal risk over W TX on Monday and over SE NM and W TX on Tuesday.
- **Severe Storms:**
 - Marginal risk (level 1 of 5) today across the TX Panhandle, W OK, W TX, SE NM and N AR.
- **River Flooding:**
 - Moderate river flooding across NE OK mostly peaking today, with impacts mostly to roads and agriculture, except in Blackwell, OK where several city blocks and residences could be affected.
- **Heat:**
 - Minor risk (level 2 of 5) today and tomorrow across TX, LA, AR, NW OK. Moderate risk (level 3 of 5) for E AR, E/SE LA and expanding to E TX through the upcoming week.
- **Fire Weather:**
 - Critical to extremely critical threat (levels 2-3 of 3) today over NW NM.
 - Elevated to critical threat (levels 1-2 of 3) for W/N NM Sunday-Tuesday.
- **Tropical:**
 - Low chance of tropical formation (20%) in the next 7 days off the SE coast of the U.S.

FEMA Region 6 Threat Matrix

Next 7 days

	Saturday, Jun 27	Sunday, Jun 28	Monday, Jun 29	Tuesday, Jun 30	Wednesday, Jul 1	Thursday, Jul 2	Friday, Jul 3
Severe Storms	TX Panhandle, W OK, W TX, SE NM, N AR						
Heavy Rain / Flash Flooding	NE AR		W TX	SE NM, W TX			
	NE OK, N AR						
Fire Weather	NW NM	NW NM	W NM	W NM			
Heat	TX, LA, AR, NW OK	TX, LA, AR, NW OK	E AR, E/SE LA	E AR, E/SE LA	E AR, E/SE LA E TX	E AR, E/SE LA E TX	E AR, E/SE LA E TX
			TX, LA, AR, NW OK	TX, LA, AR, NW OK			
Tropical							
River Flooding	NE OK	NE OK	NE OK	NE OK	NE OK	NE OK	NE OK
	LA, E AR	LA , E AR	LA, E AR	LA	LA	LA	LA

Threat levels are based on FEMA Region 6 criteria. State or local threat level criteria may differ.

For more details on the colors in the threat matrix refer to the last slide in this briefing.

5-Day Precipitation Forecast & River Flood Status

Note: Even though the image displays 5 days of forecasted rainfall, river forecasts only include 1-2 days of rainfall

- **Moderate river flooding occurring at Chikaskia River near Blackwell, with several city blocks in northeast Blackwell affected, including several residences surrounded with street flooding depths of 2 feet.**

- **In OK, moderate river flooding forecast at Caney River near Collinsville, Caney River near Ramona, Verdigris River near Lenapah, Neosho River near Commerce, with impacts to roads and agriculture.**
- **Minor flooding at Pearl River near Pearl River where some homes threatened.**

Note: Numerical levels (e.g. level 1 of 4) will not be assigned to riverine flooding due to the varying levels of impacts across flood categories.

Burn Scar Debris Flow Risk - Ruidoso, New Mexico

Sacramento Complex

	Saturday, Jun 27	Sunday, Jun 28	Monday, Jun 29	Tuesday, Jun 30	Wednesday, Jul 1
Flash Flooding	Low	Low	Low	Moderate	Moderate
Timing - CDT				Mid Afternoon thru Mid Evening	Mid Afternoon thru Mid Evening

Low (level 1 of 3)	Less than 30% chance of flash flood warning.
Moderate (level 2 of 3)	30-70% chance of flash flood warning.
High (level 3 of 3)	Over 70% chance of flash flood warning.
WPC's Excessive Rainfall Outlook is <i>Not Applicable</i> to burn scars.	

Today's Weather

Critical to extremely critical (levels 2-3 of 3) fire weather threat over NW NM.

Slight risk (level 1 of 4) for flash flooding today over NE AR.

Minor heat impact (level 2 of 5) for TX, LA, AR, NW OK.

Marginal risk (level 1 of 5) for severe storms over TX Panhandle, W OK into SE NM and W TX.

Today's Tornado & Severe Wind / Hail Probabilities

Public Event Forecast Today - Dallas & Houston, Texas

Minor heat concerns for Dallas in the afternoon/early evening. Heat illness is possible for the general public with extended outdoor exposure.

Thunderstorm Timing:
Thunderstorms are not currently in the forecast for Dallas for this afternoon/evening.

****Note - Extreme heat impacts at the stadium scale (microclimate) cannot be resolved by NWS Forecasts****

Watches, Warnings, and Advisories

Wind, Severe, Heat, and Flood Hazards

Flash flood watch until noon today over NE OK into N AR.

Heat advisories in SW TX and SE LA today.

Wind advisory through this evening over N/W NM for southwest winds gusting to 50 mph.

Tomorrow's Weather

Minor heat impacts (level 3 of 5) in portions of TX, LA, AR, NW OK. Heat illness is possible for the general public with extended outdoor exposure.

Elevated to critical (levels 1-2 of 3) fire weather conditions in W/N NM.

****Burn Scar Flash Flooding information on Burn Scar Matrix slides****

Monday's Weather

Moderate heat impacts (level 3 of 5) in portions of E AR, E/SE LA. Heat illness is possible for the general public with extended outdoor exposure.

Minor heat impact (level 2 of 5) for TX, LA, AR, NW OK.

Marginal risk (level 1 of 4) for flash flooding over W TX.

Elevated fire weather conditions (level 1 of 3) over W NM.

****Burn Scar Flash Flooding information on Burn Scar Matrix slides****

Monday - Dallas & Houston, Texas

Moderate heat risk in the afternoon/early evening in Houston. Heat illness is possible for the general public with extended outdoor exposure. Frequent hydration and cooling breaks are necessary.

Thunderstorms timing:
Thunderstorms are not forecast in Houston on Monday afternoon.

****Note - Extreme heat impacts at the stadium scale (microclimate) cannot be resolved by NWS Forecasts****

Tuesday's Weather

Forecast Chart

Forecast Rainfall

Moderate heat impacts (level 3 of 5) in portions of E AR, E/SE LA. Heat illness is possible for the general public with extended outdoor exposure.

Minor heat impact (level 2 of 5) for TX, LA, AR, NW OK.

Marginal risk (level 1 of 4) for flash flooding over SE NM and W TX.

Elevated fire weather conditions (level 1 of 3) over W NM.

Weather “Threat” Matrix for FEMA Region VI

Color	Definition	Criteria	Example(s)
Green	Little to None Safety: Rarely a Direct Threat to Life and Property Impact Potential: Typically Results in Little Inconvenience to Daily Routines	Severe: Marginal Risk from SPC Flooding: Minor flooding expected over localized areas Tropical: None Fire Weather: No Watches/Warnings, fuel moisture above 10% or green up active	- Thunderstorms expected over LA this afternoon; a few may produce winds to knock down a few trees - Something that happens almost every day in a particular season such as seabreeze storms in coastal TX
Yellow	Minor Safety: Rarely a Direct Threat to Life and Property Impact Potential: Typically Results in Some Inconvenience to Daily Life	Severe: Slight Risk from SPC Flooding: Nuisance flooded expected for a widespread area, or Minor flooding expected over isolated areas Tropical: A weak tropical wave expected to move towards or near any coastline Fire Weather: Red Flag Watches/Warnings and/or SPC outlines enhanced or critical fire outlook	2-3 inches of rainfall expected over central AR today and tonight; some minor (brief) street flooding possible - Scattered severe storms possible, one or two tornadoes expected, along with reports of strong winds/wind damage and ~1” hail
Orange	Moderate Safety: Often Threatening to Life and Property, Some Damage Unavoidable Impact Potential: Typically Results in Minor Disruption to Daily Life	Severe: Enhanced Risk from SPC Flooding: Minor flooding expected over a widespread area (including urban locations), or Moderate flooding expected over isolated areas Tropical: A Tropical Storm expected to move towards or near any coastline Fire: Critical fire outlook for more than 2 consecutive days, Warnings for 2 or more consecutive days, D3-D4 drought conditions	- A snow/sleet mix is expected to move through or near the DFW area tomorrow morning; travel impacts likely - Numerous severe storms possible, a few tornadoes possible along with several reports of wind damage along with damaging hail - Some large fires reported, burn bans advertised, critical conditions expected
Red	Major Safety: Extensive Property Damage Likely, Life Saving Actions Also will be Needed Impact Potential: Will likely result in Large Disruption to Daily Life	Severe: Moderate Risk from SPC Flooding: Moderate flooding expected over a widespread area (including urban locations) Tropical: A Hurricane expected to move towards or near any coastline Fire: Large areas of critical conditions for 2 or more days, Warnings for 3 or more days, Severe to extreme drought	- A Category 1 hurricane will be moving towards the NW Gulf in the next few days - Widespread severe storms likely, strong tornadoes, widespread wind damage, and destructive hail - Large fires ongoing throughout the area with critical fire weather conditions expected to continue
Purple	Extreme Safety: Property Damage Unavoidable, Immediate Action to Save Life will be Needed Impact Potential: Typically Results in Long-Lived Widespread Major Disruption to Daily Life	Severe: High Risk from SPC Flooding: Major flooding expected over a widespread area (including urban locations) Tropical: A Major Hurricane (Cat3 or greater) expected to move towards or near any coastline Fire: Large area of critical conditions for 2 or more days, Warnings for 3 or more days, Long term (months) of severe to extreme drought	- A Category 4 hurricane is headed towards the SE LA; major storm surge, flooding and damaging winds anticipated to begin tomorrow - Widespread severe storms expected, tornado outbreak probable with long-lived, very widespread and particularly intense storms
