

Texas Division of Emergency Management State Situation Report

Event Name	26-0016 New World Screwworm Response
Date	June 27, 2026
Time	4:00 PM
Reporting Period	2:00 PM June 26, 2026, to 2:00 PM June 27, 2026
Report Number	21

TDEM Regions Affected	6, 7
Disaster Districts Activated	18, 24

STATEWIDE CURRENT SITUATION: The Texas Animal Health Commission continues to support New World Screwworm response efforts with response operations such as compliance and checkpoint teams. These teams remain active throughout infested and adjacent zones, verifying adherence to movement guidelines while providing education and outreach to livestock transporters and producers.

Texas Parks and Wildlife Department staff continue to expand outreach, surveillance, and response efforts related to NWS. Staff have contacted thousands of cooperators, permit holders, and wildlife rehabilitation facilities to provide updates and encourage vigilance, with priority outreach focused on infested and surveillance areas and other high-risk regions. Personnel have investigated animal reports statewide, monitored game cameras in multiple state parks, delivered public education through workshops, and increased agency response capacity by training and certifying additional staff as inspectors.

The Texas A&M AgriLife Extension Service's NWS Preparedness and Response Education Course for Livestock Inspection remains available through the AgriLife Learn platform and continues to support preparedness efforts, with strong participation from livestock industry stakeholders and a growing number of individuals successfully completing the training and earning certification.

Texas Department of State Health Services continues to support the NWS response through coordinated staffing, interagency collaboration, and statewide public health outreach. Agency personnel are assisting with veterinary and livestock inspection resource requests, while the Zoonosis Control Branch and regional offices are providing training, webinars, updated guidance, and targeted communications to healthcare providers, veterinarians, animal control personnel, emergency management partners, and local health departments.

On June 19, Governor Greg Abbott announced the launch of an enhanced website that offers comprehensive information for Texans related to the New World Screwworm (NWS). Located in TDEM's Disaster Portal, Texans can visit screwworm.texas.gov to access a "one-stop shop" of information and resources from state agency partners engaged in NWS response.

State agencies are working closely with local, state, and federal partners in the field and at the State Emergency Operations Center. State partners have contacted thousands of landowners and stakeholders and remain engaged and prepared to support response operations as efforts continue to prevent further spread of NWS.

On June 8, Governor Abbott directed TDEM to activate the Texas State Emergency Operations Center to Level II (Escalated Response) to support the state's New World Screwworm response operations.

Resources from multiple state agency partners and the U.S. Department of Agriculture (USDA) are being leveraged in response to this parasite detection.

On June 5, following confirmation of NWS detection in Texas, Gov. Abbott received a briefing and provided an update to Texans on the state's response at the Texas State Emergency Operations Center. The Governor also issued an updated state disaster declaration to address NWS and prioritize operations in Uvalde and Zavala counties.

On January 26, Gov. Abbott issued a statewide disaster declaration certifying that the spread of NWS threatened Texas's livestock industry and economy and posed an imminent threat of widespread and severe property damage for all Texas counties. The declaration also authorized the use of all available resources of the state government to cope with this disaster and allowed for the allocation of state resources to address the spread of the parasite to the Texas NWS response team.

On June 25, 2025, Gov. Abbott directed the Texas Animal Health Commission and Texas Parks and Wildlife Department to establish a joint Texas New World Screwworm Response Team to lead the state's prevention and response efforts.

For more than 18 months since being informed of a positive case of NWS in Mexico, the USDA has been working to combat the impacts in coordination with state and local partners. Such measures by the USDA include importing and dispersing sterile flies in South Texas, outreach with local producers, and building a facility to assist with sterile fly operations.

The Texas Emergency Management Council continues to monitor developments.

OPERATIONAL PRIORITIES:

- Protect life and property.
- Support rapid & effective response.
- Collect and disseminate accurate incident information to improve decision-making.
- Accurately track incident costs associated with assigned resources for cost recovery.

Region 6 (Includes DDs 17, 18, and 24)

Region 6 has contacted every County Judge in the region regarding the outbreak, status, and anticipated future briefings. Region 6 is coordinating and communicating with local officials and state and federal partners. Currently, personnel are assisting with the needs of the unified command post located in Eagle Pass.

DD 18 – New Braunfels (Includes Atascosa, Bandera, Bexar, Comal, Frio, Gillespie, Guadalupe, Karnes, Kendall, Kerr, McMullen, Medina, and Wilson Counties): Disaster District Emergency Operations Center (DDEOC) 18 is activated to Level III (Increased Readiness Conditions).

DD 24 – Del Rio (Includes Dimmit, Edwards, La Salle, Kinney, Maverick, Real, Uvalde, Val Verde, and Zavala Counties): DDEOC 24 is activated to Level III (Increased Readiness Conditions).

RESPONDING STATE AGENCIES/ORGANIZATIONS REPORTS

Texas Division of Emergency Management (TDEM):

On June 8, the State Operations Center (SOC) activated to Level II (Escalated Response) in support of the New World Screwworm incident. The SOC continues directing interagency coordination to maintain unified communication, deploy necessary resources, and support response operations in affected regions across Texas.

Texas Animal Health Commission (TAHC):

NWS Statistics

as of 6/27/26 at 2:00 pm:

Total Confirmed Cases in Texas: 25

Counties affected	Total positive cases	Species affected
Zavala	1	cattle
La Salle	1	cattle
Gillespie	1	goats
Edwards	6	cattle, goats
Tom Green	1	cattle
Crockett	5	sheep
Terrell	4	cattle, goats
Medina	1	cattle
Jim Hogg	1	cattle
Counties affected	Total inactive cases	Species affected
Zavala	2 (+1)	cattle
Sutton	1	sheep
La Salle	1	cattle

NWS Certified Inspector Program Statistics

As of 6/27/26 at 2:00 PM

Application in Process	18 (+13)
Certified Inspectors	404 (+30)

**TAHC expanded eligible applicants to include emergency management personnel. As the program rolls out, TAHC is evaluating expansion of the program to additional groups*

Mission Information and Details

- To date, TAHC has inspected 9,705 animals in the infested zones, and 204 certificates have been issued for movement out of the infested zones.
- Six (6) groups of TAHC inspectors have been mobilized to conduct animal inspection/movement/outreach within the identified infested and adjacent zones. These groups will support movement inspections and issue movement certificates as quickly as possible for continuity of business, as they are requested and scheduled by the ICP.
 - On June 26, a total of 19 inspections were completed for movement out of the infested zones.
- Ten (10) compliance and checkpoint strike teams are operating roadside checkpoints. Roadside checkpoints have been established within the infested and adjacent zones to ensure NWS guideline compliance.
 - On June 26, a total of 50 stops were completed; 14 stops provided for education/outreach, and 36 verified NWS guideline compliance.
- TAHC Regional Staff are working with local producers in the region to answer questions and assist with the coordination of local jurisdictions and assets.
- NWS Identification Specialists, located at the NVSL Mobile Lab and USDA Agricultural Research Service (ARS) Lab, are screening suspect larval and fly submissions from the infested and adjacent zones for rapid identification. One (1) TAHC entomologist has been assigned to the mobile laboratory to assist.
- Providing information, outreach, and education to industry, animal owners, stakeholders, and the public about NWS to encourage surveillance and proper reporting.
- The [TAHC New World screwworms webpage](#) is updated regularly to provide information and resources, as it becomes available.

The situation is evolving, and new information will be provided as investigations continue.

Executive Director Orders identifying Infested Zones remain in effect, pursuant to Texas Agriculture Code, Chapters 161 – 168, and applicable regulations found in Title 4 of the Texas Administrative Code, Part 2, Chapters 31-60. This order remains in effect until the quarantine is released by the Commission.

Texas Parks and Wildlife Department (TPWD):

To protect the State's natural resources, including fish and wildlife, through land-based and marine patrol, TPWD will serve as a force multiplier responding to requests for support from our federal, state, and local partners to prevent, detect, control, or eradicate parasitic disease outbreaks. TPWD will deploy coordinated resources to prevent, detect, control, and eradicate parasitic disease within the Texas-Mexico Border region.

TPWD staff will continue to coordinate native wildlife surveillance efforts, which will include:

- Working with landowners to organize active wildlife surveillance on their properties
- Inspection of hunter-harvested carcasses when necessary, including animals harvested in State Parks and Wildlife Management Areas.
- Inspection of recently road-killed wildlife.
- Inspection of animals is handled as part of routine wildlife handling, whether that is by agencies, researchers, or other entities that encounter wildlife on a regular basis.
- Reporting from wildlife rehabbers, private practice vets, law enforcement, taxidermists, game processors, and the public.

June 27

- TPWD Staff have contacted 5,900 TPWD cooperators and permit holders by phone to notify them of the NWS infestations and promote surveillance.
- 2,137 cooperators located inside the Zavala, La Salle, Gillespie, Edwards, Tom Green, Crockett, Terrell and Sutton infested, and surveillance zones have received phone calls and updates on the NWS situation in their area.
- The 13 wildlife rehabilitation permit holders in the infested zones and surveillance zones have been contacted by phone.
- TPWD staff are also contacting all available TPWD cooperators that are currently not in a zone in regions covering South Texas, the Edwards Plateau, and Terrell, Pecos, and Brewster Counties. As of this report, 3,674 TPWD cooperators on that list have been contacted.
- TPWD staff have investigated 2,790 animals statewide and investigated 40 suspect cases.
- TPWD staff are monitoring 52 game cameras in four state parks. San Angelo State Park is monitoring five game cameras, and an additional 45 cameras are Hueco tanks, Kickapoo and Franklin Mountains.
- Since NWS was detected in Texas, TPWD staff have presented on NWS at 17 workshops totaling approximately 2,653 attendees.

- The WL Division currently has seven staff that have completed the AgriLife NWS training and are registered as certified inspectors with TAHC.

Texas A&M AgriLife Extension Service (AgriLife):

Currently, the AgriLife Extension SOC liaison, Public Information Officer (PIO), Disaster Assessment and Recovery (DAR) Team Members, DAR Administration, Extension Administration, and County Extension Agents are monitoring NWS movement and conditions, SOC response activity, and participating in weekly communication calls with Extension Administration, Entomologists, and Livestock Specialists. Disaster Assessment and Recovery Specialists are on standby to support County Extension Agents and ESF-11 partners with public education, animal response, and recovery efforts as requested. PIO continues to develop educational and outreach materials for publication and continues to participate in daily Joint Information Center activities.

Since June 2025, leading up to the first confirmed NWS case in Texas, AgriLife has:

- Conducted educational programs on NWS reaching over 21,200 participants.
- Established an 18-member working group of Extension Specialists across livestock, wildlife, and human disciplines focused on the development of educational information, outreach techniques, and resources for use by County Extension Agents and other appropriate Extension personnel across Texas.
- Two internal staff NWS webinar trainings completed by 500 AgriLife Extension and AgriLife Research personnel, were conducted with training support from the TAHC and TPWD.
- Hosted a hands-on professional development NWS workshop hosted at the San Antonio Livestock Show Ground for 126 AgriLife Extension and AgriLife Research personnel. In addition to others in attendance at this workshop, County Extension Agents (CEAs) from 48 of the southern and western Texas Counties were in attendance.
- Developed a County Extension NWS Educational Tool kit, complete with videos and PowerPoint Slide Decks for use in local producer and community educational outreach efforts.
- Through a grant from USDA-APHIS, Texas A&M AgriLife Extension has distributed 1,000 NWS larva collection kits among the Southern and Western County Extension offices for use in NWS detection and identification.
- AgriLife Extension is wrapping up the development of a course that will train people on what to do and expect related to the occurrence of NWS. AgriLife Extension will provide maintenance and management of this course.
- Provided expertise with local and state government representatives to better inform their preparation should an incident occur.

- Texas A&M AgriLife Extension livestock entomology specialist conducted an NWS awareness training during the monthly meeting of the Extension Disaster Education Network (EDEN) Agricultural Committee, as well as more in-depth training during the May 2026 EDEN webinar hosted by the EDEN professional development committee.

June 27

- The NWS Preparedness and Response Education Course for Livestock Inspection remains available on the AgriLife Learn educational platform. As of Noon today, 4,010 individuals are enrolled in the course, with 1,536 having completed the modules and earning completion certificates.

As of June 26

- The Texas A&M AgriLife pocket guide is complete and being distributed. It includes reporting contacts for TAHC and TPWD, along with QR codes linking to New World screwworm facts, FDA-available treatments, and screwworm.texas.gov. AgriLife has printed hard copies for county Extension offices, and TxDOT is also printing 6,500 the guide for distribution at rest stops across Texas.

Texas A&M Veterinary Medical Diagnostic Laboratory (TVMDL):

The Texas A&M Veterinary Medical Diagnostic Laboratory (TVMDL) has deployed one laboratory professional to the Texas Animal Health Commission's (TAHC) Pleasanton office to join the United States Department of Agriculture mobile detection unit deployed from USDA's National Veterinary Services Laboratory (NVSL). The lab is now operational and accepting samples for identification. A second professional remains stationed in the State Operations Center (SOC) in Austin.

TVMDL is educating clients to contact TAHC for triage of a suspected fly or larvae instead of direct submission to TVMDL. However, TVMDL Client Services staff review every daily submission and flag any cases submitted for fly/larvae ID. Laboratorians who have passed the USDA proficiency test for NWS identification stand ready to review submissions and will immediately contact TAHC and USDA should a suspect case be identified. Suspect samples will be routed as directed by TAHC and USDA.

Staff participate in the TAHC Virtual Joint Information Center daily calls.

Laboratory personnel at all four agency locations are on standby to support ESF-11 partners as needed.

TVMDL veterinarians are assisting the Texas A&M AgriLife Extension Service in producing screwworm collection kits. Talks are ongoing today to secure supplies for more kits.

TVMDL is working to validate high-throughput testing, should the need arise.

June 27

- With support from TVMDL, the NVSL mobile lab reviewed 3 cases on June 26, 2026; TVMDL did not receive any new cases at any lab location on June 26, 2026.

As of June 26

- With support from TVMDL, the NVSL mobile lab reviewed 5 cases on June 25, 2026.
- TVMDL is working to identify agency veterinarians who may be able to deploy to assist in field operations in support of TAHC.

Texas Department of State Health Services (DSHS):

DSHS State Medical Operations Center (SMOC) is at Increased Readiness in support of this incident. DSHS continues working with state partners and lead agencies to ensure ESF-8's ongoing support.

There are currently no confirmed human cases of NWS in Texas. DSHS is prepared to support, as needed, to assist in protecting the Texas livestock industry and wildlife. DSHS is ready to respond to human cases, should that occur.

June 27

- Currently, there are 118 personnel from DSHS meat Safety Assurance involved in activities relating to NWS.

Ongoing Coordination

- Center for Health Emergency Preparedness and Response (CHEPR) is actively polling agency-wide for Veterinarians and Inspectors to assist TAHC.
- Zoonosis Control Branch
 - DSHS has conducted a total of four New World Screwworm webinars since last week targeted at Local Health Departments, Animal Control Officers, and healthcare providers with a total registration of over 2,500 people registered for all four webinars.
- DSHS Public Health Region - 6/5S
 - Regional vet participated in a scheduled coordinating call with Zoonosis Control Branch and other regional veterinarians.

- Regional vet attended a call with ZCB, regional vets, and CDC communications and NWS subject matter experts.
- DSHS Public Health Region – 7
 - The PHR 7 Zoonosis Control Program shared updated NWS information and resources with:
 - 931 animal control, veterinary, medical, and public health contacts, significantly expanding outreach across multiple disciplines.
 - Provided education on NWS to 22 Animal Control Officers (ACO) and Local Health Department staff during our ACO Basic Training Course on 6/24/26.
- DSHS Public Health Region – 9/10
 - PHR 9/10 provided laboratory submission guidance, contact information and provider resources to 4 medical facilities in or near zones where NWS cases have been identified in animals.

DSHS staff across regional offices continue reaching out to partners to ensure animal control officers, veterinarians, local health departments, county judges, tribal nations, and other regional partners have the latest guidance and resources for identification, sampling, and reporting New World screwworm.

Texas Department of Agriculture (TDA):

The Texas Department of Agriculture continues to conduct surveillance, gather intelligence, collect evidence, and monitor any signs of the New World Screwworm fly in relevant portions of the state. Traps specific for the New World Screwworm have been deployed and are continually monitored, with all suspect samples sent to our state and federal partners for identification of suspect fly species.

Texas Commission on Environmental Quality (TCEQ):

TCEQ continues to closely monitor the New World Screwworm response and will coordinate with state and federal partners to provide technical assistance and guidance on carcass disposal.

Texas Department of Transportation (TxDOT):

TxDOT Emergency Management personnel continue to monitor the situation and support lead state agency partners. TxDOT continues to coordinate with TAHC regarding the increase and extended specialized fly trap locations along state-maintained Right-of-Ways (ROW) in impacted areas. TxDOT continues to coordinate with TAHC regarding compliance checkpoint locations along state-maintained roadways.

Texas Military Department (TMD):

The Texas Military Department (TMD) is supporting state agency partners in response with a SOC support team.

Texas Cyber Command (TXCC):

TXCC is monitoring the situation and stands ready to support the state's response efforts. TXCC is monitoring the situation using cybersecurity tooling and threat intelligence feeds. No cyber threats related to this event have been identified.

Texas Department of Public Safety (DPS):

Texas Department of Public Safety personnel continue to support the Texas Animal Health Commission by assigning a Texas Highway Patrol Trooper to serve as a liaison at the Incident Command Post. This individual also serves as a regional point of contact to help coordinate ongoing response efforts.

In addition, Troopers are actively patrolling in and around the impacted areas of Zavala, La Salle, Edwards, and Gillespie Counties, and remain available to respond to assistance requests at designated TAHC checkpoints as needed. DPS personnel have also provided support to TAHC by transporting test samples when required.

Texas A&M Veterinary Emergency Team (VET):

VET has returned from an assigned status in the field to an available status from home stations and remains available on an as-needed basis.

VET focused on 8 different categories of animals, totaling 5,778 animal inspections.

STATE RESOURCES COMMITTED

Agency	Resource Kind and Type	Personnel	Equipment	Status	Location
TDEM	ICP Liaison	1	1	Assigned	Eagle Pass

FINAL COMMENTS: The State Operations Center (SOC) is currently operating at Level II (Escalated Response Conditions). The Texas Division of Emergency Management (TDEM) continues to monitor the situation and will provide additional situation reports as needed.

The four levels of SOC activation are:

- Level I (Emergency Conditions)
- Level II (Escalated Response Conditions)
- Level III (Increased Readiness Conditions)
- Level IV (Normal Conditions)

This Situation Report can be found on the TDEM webpage at:
