

Texas Division of Emergency Management State Situation Report

Event Name	26-0016 New World Screwworm Response
Date	July 2, 2026
Time	4:00 PM
Reporting Period	2:00 PM July 1, 2026, to 2:00 PM July 2, 2026
Report Number	26

TDEM Regions Affected	6, 7
Disaster Districts Activated	18, 24

STATEWIDE CURRENT SITUATION: The Texas Animal Health Commission (TAHC) continues to respond to the NWS detection by coordinating inspections, enforcing compliance, providing laboratory support, and engaging stakeholders. Inspection teams facilitate the safe movement of animals from affected areas, while roadside checkpoint teams monitor compliance with established guidelines. The agency is also maintaining ongoing communication with industry, animal owners, stakeholders, and the public through outreach efforts and regular updates to its NWS webpage. Following the confirmation of additional cases in livestock and a canine, a new Infested Zone has been issued for Crockett, Pecos, and Terrell Counties.

The Texas Parks and Wildlife Department (TPWD) continues to support the NWS response through extensive outreach, surveillance, and public engagement efforts. Staff have contacted cooperators, landowners, permit holders, deer breeders, and wildlife rehabilitation permit holders across infested and surveillance zones to provide updates, encourage vigilance, and promote reporting of suspected cases, while expanding outreach into newly established response areas. These coordinated efforts strengthen early detection, surveillance, and public awareness to support the state's ongoing response.

The Texas A&M AgriLife Extension Service continues to support NWS response by providing an online educational course for livestock inspection through the AgriLife Learn platform. The course equips participants with the knowledge needed to recognize, respond to, and report potential infestations, helping strengthen statewide awareness, surveillance, and response capabilities among livestock producers, animal health professionals, and other stakeholders.

The Texas Department of State Health Services (DSHS) continues to support the NWS response through food safety outreach, operational preparedness, regional coordination, and public health education. Regional staff are also responding to newly confirmed animal cases by increasing outreach in affected areas, monitoring the evolving situation, participating in interagency coordination, and providing timely updates to stakeholders to support surveillance, preparedness, and response efforts.

On June 19, Governor Greg Abbott announced the launch of an enhanced website that offers comprehensive information for Texans related to the New World Screwworm (NWS). Located in TDEM's Disaster Portal, Texans can visit screwworm.texas.gov to access a "one-stop shop" of information and resources from state agency partners engaged in NWS response.

State agencies are working closely with local, state, and federal partners in the field and at the State Emergency Operations Center. State partners have contacted thousands of landowners and stakeholders and remain engaged and prepared to support response operations as efforts continue to prevent further spread of NWS.

On June 8, Governor Abbott directed TDEM to activate the Texas State Emergency Operations Center to Level II (Escalated Response) to support the state's New World Screwworm response operations.

Resources from multiple state agency partners and the U.S. Department of Agriculture (USDA) are being leveraged in response to this parasite detection.

On June 5, following confirmation of NWS detection in Texas, Gov. Abbott received a briefing and provided an update to Texans on the state's response at the Texas State Emergency Operations Center. The Governor also issued an updated state disaster declaration to address NWS and prioritize operations in Uvalde and Zavala counties.

On January 26, Gov. Abbott issued a statewide disaster declaration certifying that the spread of NWS threatened Texas's livestock industry and economy and posed an imminent threat of widespread and severe property damage for all Texas counties. The declaration also authorized the use of all available resources of the state government to cope with this disaster and allowed for the allocation of state resources to address the spread of the parasite to the Texas NWS response team.

On June 25, 2025, Gov. Abbott directed the Texas Animal Health Commission and Texas Parks and Wildlife Department to establish a joint Texas New World Screwworm

Response Team to lead the state's prevention and response efforts.

For more than 18 months since being informed of a positive case of NWS in Mexico, the USDA has been working to combat the impacts in coordination with state and local partners. Such measures by the USDA include importing and dispersing sterile flies in South Texas, outreach with local producers, and building a facility to assist with sterile fly operations.

The Texas Emergency Management Council continues to monitor developments.

OPERATIONAL PRIORITIES:

- Protect life and property.
- Support rapid & effective response.
- Collect and disseminate accurate incident information to improve decision-making.
- Accurately track incident costs associated with assigned resources for cost recovery.

Region 6 (Includes DDs 17, 18, and 24)

Region 6 has contacted every County Judge in the region regarding the outbreak, status, and anticipated future briefings. Region 6 is coordinating and communicating with local officials and state and federal partners. Currently, personnel are assisting with the needs of the unified command post located in Eagle Pass.

DD 18 – New Braunfels (Includes Atascosa, Bandera, Bexar, Comal, Frio, Gillespie, Guadalupe, Karnes, Kendall, Kerr, McMullen, Medina, and Wilson Counties): Disaster District Emergency Operations Center (DDEOC) 18 is activated to Level III (Increased Readiness Conditions).

DD 24 – Del Rio (Includes Dimmit, Edwards, La Salle, Kinney, Maverick, Real, Uvalde, Val Verde, and Zavala Counties): DDEOC 24 is activated to Level III (Increased Readiness Conditions).

RESPONDING STATE AGENCIES/ORGANIZATIONS REPORTS

Texas Division of Emergency Management (TDEM):

On June 8, the State Operations Center (SOC) activated to Level II (Escalated Response) in support of the New World Screwworm incident. The SOC continues directing interagency coordination to maintain unified communication, deploy necessary resources, and support response operations in affected regions across Texas

Texas Animal Health Commission (TAHC):

NWS Statistics

as of 7/02/26 at 2:00 pm:

Total Confirmed Cases in Texas: 30

Counties affected	Total positive cases	Species affected
Zavala	1	cattle
La Salle	1	cattle
Edwards	6	cattle, goats
Tom Green	1	cattle
Crockett	8	sheep, cattle
Terrell	4	cattle, goats
Medina	1	cattle
Jim Hogg	1	cattle
Uvalde	1	cattle
Counties affected	Total inactive cases	Species affected
Zavala	2	cattle
Sutton	1	sheep
La Salle	1	cattle
Gillespie	1	goats
Pecos	1	canine

NWS Certified Inspector Program Statistics

As of 7/02/26 at 2:00 PM

Application in Process	14
Certified Inspectors	544 (+32)

**TAHC expanded eligible applicants to include emergency management personnel. As the program rolls out, TAHC is evaluating expansion of the program to additional groups*

Mission Information and Details

- To date, TAHC has inspected 11,363 animals in the infested zones, and 260 certificates have been issued for movement out of the infested zones.
- Five (5) groups of TAHC inspectors have been mobilized to conduct animal inspection/movement/outreach within the identified infested and adjacent zones. These groups will support movement inspections and issue movement certificates as quickly as possible for continuity of business, as they are requested and scheduled by the ICP.
 - On July 1, a total of 10 inspections were completed for movement out of the infested zones.
- Seven (7) compliance and checkpoint strike teams are operating roadside checkpoints. Roadside checkpoints have been established within the infested and adjacent zones to ensure NWS guideline compliance.
 - On July 1, a total of 44 stops were completed; 19 stops provided for education/outreach, and 25 verified NWS guideline compliance.
- TAHC Regional Staff are working with local producers in the region to answer questions and assist with the coordination of local jurisdictions and assets.
- NWS Identification Specialists, located at the NVSL Mobile Lab and USDA Agricultural Research Service (ARS) Lab, are screening suspect larval and fly submissions from the infested and adjacent zones for rapid identification. One (1) TAHC entomologist has been assigned to the mobile laboratory to assist.
- Providing information, outreach, and education to industry, animal owners, stakeholders, and the public about NWS to encourage surveillance and proper reporting.
- The TAHC New World screwworms webpage is updated regularly to provide information and resources, as it becomes available.
- On June 30, two additional cases were confirmed in sheep, and one case was confirmed in a canine in Pecos County. Due to this detection, areas of Crockett, Pecos, and Terrell Counties are designated as Infested Zone 12.

The situation is evolving, and new information will be provided as investigations continue.

Executive Director Orders identifying Infested Zones remain in effect, pursuant to Texas Agriculture Code, Chapters 161 – 168, and applicable regulations found in Title 4 of the

Texas Administrative Code, Part 2, Chapters 31-60. This order remains in effect until the quarantine is released by the Commission.

Texas Parks and Wildlife Department (TPWD):

To protect the State's natural resources, including fish and wildlife, through land-based and marine patrol, TPWD will serve as a force multiplier responding to requests for support from our federal, state, and local partners to prevent, detect, control, or eradicate parasitic disease outbreaks. TPWD will deploy coordinated resources to prevent, detect, control, and eradicate parasitic disease within the Texas-Mexico Border region.

TPWD staff will continue to coordinate native wildlife surveillance efforts, which will include:

- Working with landowners to organize active wildlife surveillance on their properties
- Inspection of hunter-harvested carcasses when necessary, including animals harvested in State Parks and Wildlife Management Areas.
- Inspection of recently road-killed wildlife.
- Inspection of animals is handled as part of routine wildlife handling, whether that is by agencies, researchers, or other entities that encounter wildlife on a regular basis.
- Reporting from wildlife rehabbers, private practice vets, law enforcement, taxidermists, game processors, and the public.

July 2

TPWD Staff have contacted [6,263](#) TPWD cooperators and permit holders by phone to notify them of the NWS infestations and promote surveillance. [2,345](#) of these contacts have been to landowners and permit holders within infested zones and surveillance zones.

- All cooperators located inside Zavala, La Salle, Gillespie, Medina, Edwards, Tom Green, Crockett, Terrell, Jim Hogg, and Sutton counties infested zones and surveillance zones ([2,345](#)) have received phone calls and updates on the NWS situation in their area.
- All deer breeder permit holders located inside infested zones and surveillance zones ([84](#)) have been contacted by phone.
- TPWD staff have identified 50 cooperating landowners to be contacted that are inside the newly established Uvalde Zone, [21 of those have been contacted](#).
- All wildlife rehabilitation permit holders in the infested and surveillance zones ([16](#)) have been contacted by phone.

- TPWD staff have identified 29 cooperating landowners to be contacted in the newly established zone in Pecos County.
- As of this report, 3,818 TPWD cooperators on that list have been contacted.
- TPWD staff have investigated 3,143 animals statewide and investigated 43 suspect cases.
- TPWD staff are monitoring 326 game cameras on 31 Wildlife Management Areas for signs of NWS infestation.
- Since NWS was detected in Texas, TPWD staff have presented on NWS at 23 workshops, totaling approximately 3,218 attendees.

As of July 1

- TPWD staff have secured a total of 78 NWS traps and 22 Ground Release Chambers.
- TPWD staff have secured an accumulated total of 4 locations for USDA Drone Surveillance on cooperating landowners and 2 locations on TPWD managed lands.

Texas A&M AgriLife Extension Service (AgriLife):

Currently, the AgriLife Extension SOC liaison, Public Information Officer (PIO), Disaster Assessment and Recovery (DAR) Team Members, DAR Administration, Extension Administration, and County Extension Agents are monitoring NWS movement and conditions, SOC response activity, and participating in weekly communication calls with Extension Administration, Entomologists, and Livestock Specialists. Disaster Assessment and Recovery Specialists are on standby to support County Extension Agents and ESF-11 partners with public education, animal response, and recovery efforts as requested. PIO continues to develop educational and outreach materials for publication and continues to participate in daily Joint Information Center activities.

Since June 2025, leading up to the first confirmed NWS case in Texas, AgriLife has:

- Conducted educational programs on NWS reaching over 21,200 participants.
- Established an 18-member working group of Extension Specialists across livestock, wildlife, and human disciplines focused on the development of educational information, outreach techniques, and resources for use by County Extension Agents and other appropriate Extension personnel across Texas.
- Two internal staff NWS webinar trainings completed by 500 AgriLife Extension and AgriLife Research personnel, were conducted with training support from the TAHC and TPWD.
- Hosted a hands-on professional development NWS workshop hosted at the San Antonio Livestock Show Ground for 126 AgriLife Extension and AgriLife Research personnel. In addition to others in attendance at this workshop, County

Extension Agents (CEAs) from 48 of the southern and western Texas Counties were in attendance.

- Developed a County Extension NWS Educational Tool kit, complete with videos and PowerPoint Slide Decks for use in local producer and community educational outreach efforts.
- Through a grant from USDA-APHIS, Texas A&M AgriLife Extension has distributed 1,000 NWS larva collection kits among the Southern and Western County Extension offices for use in NWS detection and identification.
- AgriLife Extension is wrapping up the development of a course that will train people on what to do and expect related to the occurrence of NWS. AgriLife Extension will provide maintenance and management of this course.
- Provided expertise with local and state government representatives to better inform their preparation should an incident occur.
- Texas A&M AgriLife Extension livestock entomology specialist conducted an NWS awareness training during the monthly meeting of the Extension Disaster Education Network (EDEN) Agricultural Committee, as well as more in-depth training during the May 2026 EDEN webinar hosted by the EDEN professional development committee.

July 2

- The NWS Preparedness and Response Education Course for Livestock Inspection is available on the AgriLife Learn educational platform. As of Noon today, 4,562 individuals are enrolled in the course, with 1,912 having completed the modules and earning completion certificates.

Texas A&M Veterinary Medical Diagnostic Laboratory (TVMDL):

The Texas A&M Veterinary Medical Diagnostic Laboratory (TVMDL) has deployed one laboratory professional to the Texas Animal Health Commission's (TAHC) Pleasanton office to join the United States Department of Agriculture mobile detection unit deployed from USDA's National Veterinary Services Laboratory (NVSL). The lab is now operational and accepting samples for identification. A second professional remains stationed in the State Operations Center (SOC) in Austin.

TVMDL is educating clients to contact TAHC for triage of a suspected fly or larvae instead of direct submission to TVMDL. However, TVMDL Client Services staff review every daily submission and flag any cases submitted for fly/larvae ID. Laboratorians who have passed the USDA proficiency test for NWS identification stand ready to review submissions and will immediately contact TAHC and USDA should a suspect case be identified. Suspect samples will be routed as directed by TAHC and USDA.

Staff participate in the TAHC Virtual Joint Information Center daily calls.

Laboratory personnel at all four agency locations are on standby to support ESF-11 partners as needed.

TVMDL veterinarians are assisting the Texas A&M AgriLife Extension Service in producing screwworm collection kits. Talks are ongoing today to secure supplies for more kits.

TVMDL is working to validate high-throughput testing, should the need arise.

July 2

- With support from TVMDL, the NVSL mobile lab reviewed 3 cases on July 1, 2026; TVMDL received 0 cases on July 1, 2026.

As of July 1

- TVMDL is continuing to work to identify agency veterinarians who can be field-deployed on a rotational basis to support the efforts of TAHC.

Texas Department of State Health Services (DSHS):

DSHS State Medical Operations Center (SMOC) is at Increased Readiness in support of this incident. DSHS continues working with state partners and lead agencies to ensure ESF-8's ongoing support.

There are currently no confirmed human cases of NWS in Texas. DSHS is prepared to support, as needed, to assist in protecting the Texas livestock industry and wildlife. DSHS is ready to respond to human cases, should that occur.

July 2

Food Safety:

- Meat Safety personnel have distributed learning materials, in both Spanish and English, and conducted follow-up in-person engagements at active slaughter establishments under state of Texas Grants of Inspection or Custom Exemption.
- A webinar for slaughter and processing establishments and other stakeholders was also conducted on 7/1 in coordination with partner state and federal agencies.

Ongoing Coordination:

- Center for Health Emergency Preparedness and Response (CHEPR)
 - DSHS SMOC Logistics met with TDEM Logistics to discuss and review the resource tracking and deployment process for personnel who could potentially deploy to support New World Screwworm field operations.
- DSHS Public Health Region – 1 (Panhandle)

- PHR 1 staff members continue to take the NWS Inspector Training.
- DSHS Public Health Region – 8 (Bexar / San Antonio / Uvalde area)
 - Zoonosis Control team will be conducting animal shelter visits in Uvalde County today and providing NWS guidance.
- DSHS Public Health Region – 9/10 (El Paso / Midland area)
 - Region 9/10 reached out to vet clinics and ACOs in the Pecos County area following confirmation of a positive case in a dog.
 - Region 9/10 Zoonosis Control met with regional nurses and Communicable Disease staff to discuss NWS, current situation, and concerns for rural and vulnerable populations.
- DSHS Public Health Region – 11 (Harlingen / Edinburg area)
 - Regional activity is focused on education alongside TAHC & TPWD. PHR11 will educate ACOs, LHDs, and respond to questions from clinicians and the public. PHR11 will monitor the number of animal and human cases as well as the activity in Mexico.
 - Continue monitoring the evolving NWS situation and provide updates to stakeholders on new information as it becomes available. Work with PHR-11 Zoonosis and Office of Border Public Health team to provide daily updates regarding NWS.

DSHS staff across regional offices continue reaching out to partners to ensure animal control officers, veterinarians, local health departments, county judges, tribal nations, and other regional partners have the latest guidance and resources for identification, sampling, and reporting New World Screwworm.

Texas Department of Agriculture (TDA):

The Texas Department of Agriculture continues to conduct surveillance, gather intelligence, collect evidence, and monitor any signs of the New World Screwworm fly in relevant portions of the state. Traps specific for the New World Screwworm have been deployed and are continually monitored, with all suspect samples sent to our state and federal partners for identification of suspect fly species.

Texas Commission on Environmental Quality (TCEQ):

TCEQ continues to closely monitor the New World Screwworm response and will coordinate with state and federal partners to provide technical assistance and guidance on carcass disposal.

Texas Department of Transportation (TxDOT):

TxDOT Emergency Management personnel continue to monitor the situation and support lead state agency partners. TxDOT continues to coordinate with TAHC regarding the increase and extended specialized fly trap locations along state-maintained Right-of-Ways (ROW) in impacted areas. TxDOT continues to coordinate with TAHC regarding compliance checkpoint locations along state-maintained roadways.

Texas Military Department (TMD):

The Texas Military Department (TMD) is supporting state agency partners in response with a SOC support team. TMD has activated an Aerial Dispersal Team in South Texas to assist partners with sterile fly dispersal.

Texas Cyber Command (TXCC):

TXCC is monitoring the situation and stands ready to support the state's response efforts. TXCC is monitoring the situation using cybersecurity tooling and threat intelligence feeds. No cyber threats related to this event have been identified.

Texas Department of Public Safety (DPS):

As DPS continues to support NWS response, the updated checkpoints for Gillespie, Tom Green, and Sutton Counties have been distributed to DPS field personnel. THP personnel continue to patrol the affected areas identified by TAHC in Zavala, La Salle, Edwards, Crockett, Terrell, Medina, and Jim Hogg Counties. THP is available to respond to requests for assistance if needed.

Texas A&M Veterinary Emergency Team (VET):

VET has returned from an assigned status in the field to an available status from home stations and remains available on an as-needed basis.

VET focused on 8 different categories of animals, totaling 5,778 animal inspections.

Texas A&M Forest Service (TAMFS):

TAMFS is providing agency personnel to assist TAHC as checkpoint investigators in the screwworm-infected zones

STATE RESOURCES COMMITTED

Agency	Resource Kind and Type	Personnel	Equipment	Status	Location
TDEM	ICP Liaison	1	1	Assigned	Eagle Pass
TDEM	SOC Support	13	0	Activated	SOC
AgriLife	SOC Liaison	2	2	Assigned	Austin

TMVDL	Field Veterinarian	1	1	Activated	TBD

FINAL COMMENTS: The State Operations Center (SOC) is currently operating at Level II (Escalated Response Conditions). The Texas Division of Emergency Management (TDEM) continues to monitor the situation and will provide additional situation reports as needed.

The four levels of SOC activation are:

- Level I (Emergency Conditions)
- Level II (Escalated Response Conditions)
- Level III (Increased Readiness Conditions)
- Level IV (Normal Conditions)

This Situation Report can be found on the TDEM webpage at:
