FEMA Region 6 Weather Threat Briefing

Tuesday, July 14, 2026

Disclaimer: The purpose of this briefing is to provide a **Regional** weather threat assessment and is meant as a general overview. County/Parish decision makers should consult their local NWS forecast offices for the latest detailed, local weather information. To find your local NWS forecast office, go to www.weather.gov/srh.

National Oceanic and
Atmospheric Administration
U.S. Department of Commerce

National Weather Service
Sector 2 - Texas, Gulf Coast, and Puerto Rico

Summary

- **Flash Flooding:**

- **Slight to moderate risk (levels 2-3 of 4) over much of the southern half of Texas through Thursday.**
- **Widespread amounts of 7-10" could occur across S Ctrl / SW TX through the end of the week with high end bullseyes of 10-15" today and again tomorrow.**
 - **Flood Watches in effect for SW-Cntrl TX.**
- **Monitoring portions of NM for additional flash flood concerns by Thursday into the upcoming weekend.**
- **Any river flood threat from this rainfall will depend on where the heaviest rain falls, but minor to moderate river flooding could occur with the highest risk being in SW-C TX.**
 - **Worst case scenario, major river flooding could occur in SW-C TX in flashy river basins today through Thursday.**

- **Tropical:**

- **No development expected over the next 7 days.**

FEMA Region 6 Threat Matrix

Next 7 days

	Tuesday, Jul 14	Wednesday, Jul 15	Thursday, Jul 16	Friday, Jul 17	Saturday, Jul 18	Sunday, Jul 19	Monday, Jul 20
Severe Storms							
Heavy Rain / Flash Flooding	S-Cntrl, SW TX	S-Cntrl, SW TX	SW TX	SW NM	NM, SW TX	NM, Far W TX	NM
	W-Cntrl-SE TX, SW LA	W-Cntrl-SE TX	W NM, W-Cntrl-SW TX				
Fire Weather							
Tropical							
River Flooding	SW/CTX	SW TX/C	SW/CTX	SW/CTX	Monitoring TX	Monitoring TX	

Threat levels are based on FEMA Region 6 criteria. State or local threat level criteria may differ.
For more details on the colors in the threat matrix refer to the last slide in this briefing.

Risk Levels	Little to None	Minor	Moderate	Major	Extreme
-------------	----------------	-------	----------	-------	---------

Current Radar/Hazards

Flash Flood Watch across cntrl TX through Thursday evening across SW-C TX.

Fire Weather Outlooks

High and Low Temperatures Next 3 Days

Colors are Departure from Normal (Reds/Oranges = Above Normal, Greens/Blues/Purples = Below Normal)

Areas of Possible Development

Area	Chance of Development	Potential Impacts to FEMA 6

Active Tropical Cyclones

Storm	Potential Impacts to FEMA 6

See <http://www.hurricanes.gov> for the latest on the tropics or any active storms

5-Day Precipitation Forecast & River Flood Status

Note: Even though the image displays 5 days of forecasted rainfall, river forecasts only include 1-2 days of rainfall

Monitoring rivers in portions of TX (Rio Grande, Guadalupe, San Antonio, Sabine, Upper Trinity, Neches, San Jacinto) and S LA (areas that received heaviest rain in TS Arthur) for responses from heavy rainfall over the next several days.

Note: Numerical levels (e.g. level 1 of 4) will not be assigned to riverine flooding due to the varying levels of impacts across flood categories.

Burn Scar Debris Flow Risk - Ruidoso, New Mexico

Sacramento Complex

	Tuesday, Jul 14	Wednesday, Jul 15	Thursday, Jul 16	Friday, Jul 17	Saturday, Jul 18
Flash Flooding	Low	Moderate	Moderate	Moderate	Moderate
Timing - CDT		Afternoon/Evening	Afternoon/Evening	Afternoon/Evening	Afternoon/Evening

Low (level 1 of 3)	Less than 30% chance of flash flood warning.
Moderate (level 2 of 3)	30-70% chance of flash flood warning.
High (level 3 of 3)	Over 70% chance of flash flood warning.
WPC's Excessive Rainfall Outlook is <i>Not Applicable</i> to burn scars.	

Today's Weather

Moderate risk (level 3 of 4) for flash flooding over S-Cntrl, STX. High-end bullseyes of 10-15" of rainfall, which may lead to flash flooding especially in poor drainage areas.

Slight risk (level 2 of 4) for W-Cntrl-SE TX, SW LA.

Today's Tornado & Severe Wind / Hail Probabilities

Public Event Forecast Today - Dallas & Houston, Texas

Minor heat risk for Dallas. Unacclimated populations (including international visitors) and sensitive groups are at risk for heat illness. Monitor for early symptoms.

Thunderstorm Timing:
Scattered thunderstorms after 12 PM. Severe weather is not expected, but thunderstorms will be capable of producing heavy rain, gusty winds and frequent lightning.

****Note - Extreme heat impacts at the stadium scale (microclimate) cannot be resolved by NWS Forecasts****

Tomorrow's Weather

Moderate risk (level 3 of 4) for flash flooding over S-Cntrl, SW TX. High-end bullseyes of 10-15+” of rainfall, which may lead to flash flooding especially in poor drainage areas.

Potential “High Risk” upgrade from WPC

Slight risk (level 2 of 4) for flash flooding in W-Cntrl-SE TX.

Weather “Threat” Matrix for FEMA Region VI			
Color	Definition	Criteria	Example(s)
Green	Little to None Safety: Rarely a Direct Threat to Life and Property Impact Potential: Typically Results in Little Inconvenience to Daily Routines	Severe: Marginal Risk from SPC Flooding: Minor flooding expected over localized areas Tropical: None Fire Weather: No Watches/Warnings, fuel moisture above 10% or green up active	- Thunderstorms expected over LA this afternoon; a few may produce winds to knock down a few trees - Something that happens almost every day in a particular season such as seabreeze storms in coastal TX
Yellow	Minor Safety: Rarely a Direct Threat to Life and Property Impact Potential: Typically Results in Some Inconvenience to Daily Life	Severe: Slight Risk from SPC Flooding: Nuisance flooded expected for a widespread area, or Minor flooding expected over isolated areas Tropical: A weak tropical wave expected to move towards or near any coastline Fire Weather: Red Flag Watches/Warnings and/or SPC outlines enhanced or critical fire outlook	2-3 inches of rainfall expected over central AR today and tonight; some minor (brief) street flooding possible - Scattered severe storms possible, one or two tornadoes expected, along with reports of strong winds/wind damage and ~1” hail
Orange	Moderate Safety: Often Threatening to Life and Property, Some Damage Unavoidable Impact Potential: Typically Results in Minor Disruption to Daily Life	Severe: Enhanced Risk from SPC Flooding: Minor flooding expected over a widespread area (including urban locations), or Moderate flooding expected over isolated areas Tropical: A Tropical Storm expected to move towards or near any coastline Fire: Critical fire outlook for more than 2 consecutive days, Warnings for 2 or more consecutive days, D3-D4 drought conditions	- A snow/sleet mix is expected to move through or near the DFW area tomorrow morning; travel impacts likely - Numerous severe storms possible, a few tornadoes possible along with several reports of wind damage along with damaging hail - Some large fires reported, burn bans advertised, critical conditions expected
Red	Major Safety: Extensive Property Damage Likely, Life Saving Actions Also will be Needed Impact Potential: Will likely result in Large Disruption to Daily Life	Severe: Moderate Risk from SPC Flooding: Moderate flooding expected over a widespread area (including urban locations) Tropical: A Hurricane expected to move towards or near any coastline Fire: Large areas of critical conditions for 2 or more days, Warnings for 3 or more days, Severe to extreme drought	- A Category 1 hurricane will be moving towards the NW Gulf in the next few days - Widespread severe storms likely, strong tornadoes, widespread wind damage, and destructive hail - Large fires ongoing throughout the area with critical fire weather conditions expected to continue
Purple	Extreme Safety: Property Damage Unavoidable, Immediate Action to Save Life will be Needed Impact Potential: Typically Results in Long-Lived Widespread Major Disruption to Daily Life	Severe: High Risk from SPC Flooding: Major flooding expected over a widespread area (including urban locations) Tropical: A Major Hurricane (Cat3 or greater) expected to move towards or near any coastline Fire: Large area of critical conditions for 2 or more days, Warnings for 3 or more days, Long term (months) of severe to extreme drought	- A Category 4 hurricane is headed towards the SE LA; major storm surge, flooding and damaging winds anticipated to begin tomorrow - Widespread severe storms expected, tornado outbreak probable with long-lived, very widespread and particularly intense storms
