FEMA Region 6 Weather Threat Briefing

Saturday, July 18, 2026

Disclaimer: The purpose of this briefing is to provide a **Regional** weather threat assessment and is meant as a general overview. County/Parish decision makers should consult their local NWS forecast offices for the latest detailed, local weather information. To find your local NWS forecast office, go to www.weather.gov/srh.

Summary

- **Flash Flooding:**

- **Slight risk over NM and W TX on today/tomorrow.**
- **Monitoring S NM for Burn Scar flash flooding concerns through Monday.**
 - **Highest risk for debris flooding is today. Low threat by next Tuesday.**
- **Several rivers in portions of SW/C TX (Nueces, Frio, Pecos, San Antonio and Cibolo) are in moderate to major flood stage. Major impacts to homes, infrastructure, roads.**
- **Fast response rivers decrease in river levels this weekend, with a couple slower response rivers staying elevated or rising in S/C TX.**

- **Tropical:**

- **NE Gulf needs to be watched mid week - possible impacts to LA/TX.**

FEMA Region 6 Threat Matrix

Next 7 days

	Saturday, Jul 18	Sunday, Jul 19	Monday, Jul 20	Tuesday, Jul 21	Wednesday, Jul 22	Thursday, Jul 23	Friday, Jul 24
Severe Storms							
Heavy Rain / Flash Flooding	NM, WTX	S NM, Far WTX	W NM	W NM	W NM		
Fire Weather							
Tropical							
River Flooding	SW/CTX	SW/C/STX	SW/C/STX	SW/C/STX	STX	STX	STX

Threat levels are based on FEMA Region 6 criteria. State or local threat level criteria may differ.
For more details on the colors in the threat matrix refer to the last slide in this briefing.

Risk Levels	Little to None	Minor	Moderate	Major	Extreme
-------------	----------------	-------	----------	-------	---------

Current Radar/Hazards

Heat Advisories in E AR, E LA through this afternoon. Heat Advisories will continue into Sunday.

Flash Flood Watch over the Sacramento Burn Scar Complex in NM from 1 PM CDT through 7 PM CDT today.

5-Day Precipitation Forecast & River Flood Status

Note: Even though the image displays 5 days of forecasted rainfall, river forecasts only include 1-2 days of rainfall

Several rivers in portions of SW/CTX (Nueces, Frio, Pecos, San Antonio and Cibolo) are in moderate to major flood stage. Major impacts to homes, infrastructure, roads.

Main stem downstream rivers will be in minor to major into next week until water is caught by lakes.

Note: Numerical levels (e.g. level 1 of 4) will not be assigned to riverine flooding due to the varying levels of impacts across flood categories.

Tropical Weather Outlook – Atlantic/Gulf

Areas of Possible Development

Area	Chance of Development	Potential Impacts to FEMA 6
I	Low (30%)	Monitoring for mid-week

Active Tropical Cyclones

Storm	Potential Impacts to FEMA 6

See <http://www.hurricanes.gov> for the latest on the tropics or any active storms

Burn Scar Debris Flow Risk - Ruidoso, New Mexico

Sacramento Complex

	Saturday, Jul 18	Sunday, Jul 19	Monday, Jul 20	Tuesday, Jul 21	Wednesday, Jul 22
Flash Flooding	High	Moderate	Moderate	Low	Low
Timing - CDT	1 PM-7 PM	Afternoon/Evening	Afternoon/Evening		

Low (level 1 of 3)	Less than 30% chance of flash flood warning.
Moderate (level 2 of 3)	30-70% chance of flash flood warning.
High (level 3 of 3)	Over 70% chance of flash flood warning.
WPC's Excessive Rainfall Outlook is <i>Not Applicable</i> to burn scars.	

Today's Weather

Slight risk (level 2 of 4) for flash flooding in NM, W TX. High-end amounts 4-7".

Timing: Storms ramp up between 1-3pm and decrease between 7-10pm.

Weather “Threat” Matrix for FEMA Region VI

Color	Definition	Criteria	Example(s)
Green	Little to None Safety: Rarely a Direct Threat to Life and Property Impact Potential: Typically Results in Little Inconvenience to Daily Routines	Severe: Marginal Risk from SPC Flooding: Minor flooding expected over localized areas Tropical: None Fire Weather: No Watches/Warnings, fuel moisture above 10% or green up active	- Thunderstorms expected over LA this afternoon; a few may produce winds to knock down a few trees - Something that happens almost every day in a particular season such as seabreeze storms in coastal TX
Yellow	Minor Safety: Rarely a Direct Threat to Life and Property Impact Potential: Typically Results in Some Inconvenience to Daily Life	Severe: Slight Risk from SPC Flooding: Nuisance flooded expected for a widespread area, or Minor flooding expected over isolated areas Tropical: A weak tropical wave expected to move towards or near any coastline Fire Weather: Red Flag Watches/Warnings and/or SPC outlines enhanced or critical fire outlook	2-3 inches of rainfall expected over central AR today and tonight; some minor (brief) street flooding possible - Scattered severe storms possible, one or two tornadoes expected, along with reports of strong winds/wind damage and ~1” hail
Orange	Moderate Safety: Often Threatening to Life and Property, Some Damage Unavoidable Impact Potential: Typically Results in Minor Disruption to Daily Life	Severe: Enhanced Risk from SPC Flooding: Minor flooding expected over a widespread area (including urban locations), or Moderate flooding expected over isolated areas Tropical: A Tropical Storm expected to move towards or near any coastline Fire: Critical fire outlook for more than 2 consecutive days, Warnings for 2 or more consecutive days, D3-D4 drought conditions	- A snow/sleet mix is expected to move through or near the DFW area tomorrow morning; travel impacts likely - Numerous severe storms possible, a few tornadoes possible along with several reports of wind damage along with damaging hail - Some large fires reported, burn bans advertised, critical conditions expected
Red	Major Safety: Extensive Property Damage Likely, Life Saving Actions Also will be Needed Impact Potential: Will likely result in Large Disruption to Daily Life	Severe: Moderate Risk from SPC Flooding: Moderate flooding expected over a widespread area (including urban locations) Tropical: A Hurricane expected to move towards or near any coastline Fire: Large areas of critical conditions for 2 or more days, Warnings for 3 or more days, Severe to extreme drought	- A Category 1 hurricane will be moving towards the NW Gulf in the next few days - Widespread severe storms likely, strong tornadoes, widespread wind damage, and destructive hail - Large fires ongoing throughout the area with critical fire weather conditions expected to continue
Purple	Extreme Safety: Property Damage Unavoidable, Immediate Action to Save Life will be Needed Impact Potential: Typically Results in Long-Lived Widespread Major Disruption to Daily Life	Severe: High Risk from SPC Flooding: Major flooding expected over a widespread area (including urban locations) Tropical: A Major Hurricane (Cat3 or greater) expected to move towards or near any coastline Fire: Large area of critical conditions for 2 or more days, Warnings for 3 or more days, Long term (months) of severe to extreme drought	- A Category 4 hurricane is headed towards the SE LA; major storm surge, flooding and damaging winds anticipated to begin tomorrow - Widespread severe storms expected, tornado outbreak probable with long-lived, very widespread and particularly intense storms
