FEMA Region 6 Weather Threat Briefing

Sunday, July 19, 2026

Disclaimer: The purpose of this briefing is to provide a **Regional** weather threat assessment and is meant as a general overview. County/Parish decision makers should consult their local NWS forecast offices for the latest detailed, local weather information. To find your local NWS forecast office, go to www.weather.gov/srh.

National Oceanic and
Atmospheric Administration
U.S. Department of Commerce

National Weather Service
Sector 2 - Texas, Gulf Coast, and Puerto Rico

Summary

- **Flash Flooding:**

- **Marginal to Slight risk (levels 1-2 of 4) over NM and W TX on today/Monday and over western NM Tuesday-Thursday.**
- **S NM for Burn Scar flash flooding concerns remain Moderate through Wednesday, but confidence after today decreases significantly.**
- **Moderate to Major flooding on the San Antonio and Rio Grande rivers ends today/tonight Rio Grande at Laredo will drop below moderate tomorrow morning.**
- **Nueces & Frio will be in major flood stage for several days as water moves downstream.**

- **Tropical:**

- **Concerns for development in Gulf increasing with possible Potential Tropical Cyclone (PTC) or Tropical Depression forming today. Impacts to S LA would be from heavy rainfall and winds.**

FEMA Region 6 Threat Matrix

Next 7 days

	Sunday, Jul 19	Monday, Jul 20	Tuesday, Jul 21	Wednesday, Jul 22	Thursday, Jul 23	Friday, Jul 24	Saturday, Jul 25
Severe Storms	SE LA						
Heavy Rain / Flash Flooding	S NM, WTX	Far WTX, S/W NM	W NM	W NM, SE LA	NW NM, SE LA		
	SE LA	SE LA	SE LA				
Fire Weather							
Tropical							
River Flooding	SW/C/STX	SW/C/STX	SW/C/STX	STX	STX	STX	STX

Threat levels are based on FEMA Region 6 criteria. State or local threat level criteria may differ.
For more details on the colors in the threat matrix refer to the last slide in this briefing.

Risk Levels	Little to None	Minor	Moderate	Major	Extreme
-------------	----------------	-------	----------	-------	---------

Current Radar/Hazards

**Heat Advisories in NE OK, C/E AR, E LA through 8 PM CDT.
More likely through Tuesday.**

**Flash Flood Watch over the Sacramento Burn Scar Complex
in NM from 1 PM CDT through 7 PM CDT today.**

Max Temperature Forecast

High and Low Temperatures Next 3 Days

Colors are Departure from Normal (Reds/Oranges = Above Normal, Greens/Blues/Purples = Below Normal)

National Oceanic and
Atmospheric Administration
U.S. Department of Commerce

National Weather Service
Sector 2 - Texas, Gulf Coast, and Puerto Rico

Burn Scar Debris Flow Risk - Ruidoso, New Mexico

Sacramento Complex

	Sunday, Jul 19	Monday, Jul 20	Tuesday, Jul 21	Wednesday, Jul 22	Thursday, Jul 23
Flash Flooding	Moderate	Moderate	Moderate	Moderate	Low
Timing - CDT	1 PM - 7 PM	1 PM - 5 PM	Afternoon/Evening	Afternoon/Evening	

Low (level 1 of 3)	Less than 30% chance of flash flood warning.
Moderate (level 2 of 3)	30-70% chance of flash flood warning.
High (level 3 of 3)	Over 70% chance of flash flood warning.
WPC's Excessive Rainfall Outlook is <i>Not Applicable</i> to burn scars.	

5-Day Precipitation Forecast & River Flood Status

Note: Even though the image displays 5 days of forecasted rainfall, river forecasts only include 1-2 days of rainfall

Moderate to Major flooding on the San Antonio and Rio Grande rivers ends today/tonight Rio Grande at Laredo will drop below moderate tomorrow morning. Nueces & Frio will be in major flood stage for several days as water moves downstream.

Major impacts to homes, infrastructure, roads.

Note: Numerical levels (e.g. level 1 of 4) will not be assigned to riverine flooding due to the varying levels of impacts across flood categories.

Weather “Threat” Matrix for FEMA Region VI

Color	Definition	Criteria	Example(s)
Green	Little to None Safety: Rarely a Direct Threat to Life and Property Impact Potential: Typically Results in Little Inconvenience to Daily Routines	Severe: Marginal Risk from SPC Flooding: Minor flooding expected over localized areas Tropical: None Fire Weather: No Watches/Warnings, fuel moisture above 10% or green up active	- Thunderstorms expected over LA this afternoon; a few may produce winds to knock down a few trees - Something that happens almost every day in a particular season such as seabreeze storms in coastal TX
Yellow	Minor Safety: Rarely a Direct Threat to Life and Property Impact Potential: Typically Results in Some Inconvenience to Daily Life	Severe: Slight Risk from SPC Flooding: Nuisance flooded expected for a widespread area, or Minor flooding expected over isolated areas Tropical: A weak tropical wave expected to move towards or near any coastline Fire Weather: Red Flag Watches/Warnings and/or SPC outlines enhanced or critical fire outlook	2-3 inches of rainfall expected over central AR today and tonight; some minor (brief) street flooding possible - Scattered severe storms possible, one or two tornadoes expected, along with reports of strong winds/wind damage and ~1” hail
Orange	Moderate Safety: Often Threatening to Life and Property, Some Damage Unavoidable Impact Potential: Typically Results in Minor Disruption to Daily Life	Severe: Enhanced Risk from SPC Flooding: Minor flooding expected over a widespread area (including urban locations), or Moderate flooding expected over isolated areas Tropical: A Tropical Storm expected to move towards or near any coastline Fire: Critical fire outlook for more than 2 consecutive days, Warnings for 2 or more consecutive days, D3-D4 drought conditions	- A snow/sleet mix is expected to move through or near the DFW area tomorrow morning; travel impacts likely - Numerous severe storms possible, a few tornadoes possible along with several reports of wind damage along with damaging hail - Some large fires reported, burn bans advertised, critical conditions expected
Red	Major Safety: Extensive Property Damage Likely, Life Saving Actions Also will be Needed Impact Potential: Will likely result in Large Disruption to Daily Life	Severe: Moderate Risk from SPC Flooding: Moderate flooding expected over a widespread area (including urban locations) Tropical: A Hurricane expected to move towards or near any coastline Fire: Large areas of critical conditions for 2 or more days, Warnings for 3 or more days, Severe to extreme drought	- A Category 1 hurricane will be moving towards the NW Gulf in the next few days - Widespread severe storms likely, strong tornadoes, widespread wind damage, and destructive hail - Large fires ongoing throughout the area with critical fire weather conditions expected to continue
Purple	Extreme Safety: Property Damage Unavoidable, Immediate Action to Save Life will be Needed Impact Potential: Typically Results in Long-Lived Widespread Major Disruption to Daily Life	Severe: High Risk from SPC Flooding: Major flooding expected over a widespread area (including urban locations) Tropical: A Major Hurricane (Cat3 or greater) expected to move towards or near any coastline Fire: Large area of critical conditions for 2 or more days, Warnings for 3 or more days, Long term (months) of severe to extreme drought	- A Category 4 hurricane is headed towards the SE LA; major storm surge, flooding and damaging winds anticipated to begin tomorrow - Widespread severe storms expected, tornado outbreak probable with long-lived, very widespread and particularly intense storms
