| <b>TDEM Regions Affected</b>        | 5, 6, 7 |
| <b>Disaster Districts Activated</b> | N/A     |

**STATEWIDE CURRENT SITUATION:** The Texas Disaster Portal continues to be updated regularly with the latest guidance, resources, and information from state agencies engaged in the response to New World Screwworm. The one-stop-shop portal, located on the Texas Division of Emergency Management website, can be accessed online at [screwworm.texas.gov](https://screwworm.texas.gov).

The Texas Animal Health Commission (TAHC) continues coordinated response efforts to contain and manage NWS, including animal inspections, movement certification, roadside compliance activities, market screening, laboratory identification, producer assistance, and stakeholder outreach. Field and regional personnel remain actively engaged with producers and local partners, while educational resources and movement guidance are being updated as conditions evolve. Infested Zone orders remain in effect pending quarantine release.

The Texas Parks and Wildlife Department (TPWD) continues to support statewide efforts to prevent, detect, control, and eradicate NWS by coordinating wildlife surveillance, supporting federal, state, and local partners, and engaging landowners and stakeholders. Activities include wildlife inspections, suspect case investigations, trap site coordination, game camera monitoring, public outreach, and staff training to strengthen surveillance and response capabilities across Texas.

The Texas A&M AgriLife Extension Service continues to support the statewide NWS response through coordinated monitoring, public education, outreach, preparedness, and technical assistance. Extension personnel remain engaged with state and local partners, while educational resources, training, and detection materials are being expanded.

The Texas Department of State Health Services (DSHS) remains at Increased Readiness to support the NWS response and continues coordinating with state partners and lead agencies to provide public health support. Regional staff are maintaining outreach with veterinarians, animal control officials, local health departments, county leadership, tribal nations, and other partners to promote awareness, identification, sampling, reporting, and preparedness for potential human cases.

On June 19, Governor Greg Abbott announced the launch of an enhanced website that offers comprehensive information for Texans related to the New World Screwworm (NWS). Located in TDEM's Disaster Portal, Texans can visit [screwworm.texas.gov](https://screwworm.texas.gov) to access a "one-stop shop" of information and resources from state agency partners engaged in NWS response.

State agencies are working closely with local, state, and federal partners in the field and at the State Emergency Operations Center. State partners have contacted thousands of landowners and stakeholders and remain engaged and prepared to support response operations as efforts continue to prevent further spread of NWS.

On June 8, Governor Abbott directed TDEM to activate the Texas State Emergency Operations Center to Level II (Escalated Response) to support the state's New World Screwworm response operations.

Resources from multiple state agency partners and the U.S. Department of Agriculture (USDA) are being leveraged in response to this parasite detection.

On June 5, following confirmation of NWS detection in Texas, Gov. Abbott received a briefing and provided an update to Texans on the state's response at the Texas State Emergency Operations Center. The Governor also issued an updated state disaster declaration to address NWS and prioritize operations in Uvalde and Zavala counties.

On January 26, Gov. Abbott issued a statewide disaster declaration certifying that the spread of NWS threatened Texas's livestock industry and economy and posed an imminent threat of widespread and severe property damage for all Texas counties. The declaration also authorized the use of all available resources of the state government to cope with this disaster and allowed for the allocation of state resources to address the spread of the parasite to the Texas NWS response team.

On June 25, 2025, Gov. Abbott directed the Texas Animal Health Commission and Texas Parks and Wildlife Department to establish a joint Texas New World Screwworm Response Team to lead the state's prevention and response efforts.

For more than 18 months since being informed of a positive case of NWS in Mexico, the USDA has been working to combat the impacts in coordination with state and local partners. Such measures by the USDA include importing and dispersing sterile flies in South Texas, outreach with local producers, and building a facility to assist with sterile fly operations.

The Texas Emergency Management Council continues to monitor developments.

#### **OPERATIONAL PRIORITIES:**

- Protect life and property.
- Support rapid & effective response.
- Collect and disseminate accurate incident information to improve decision-making.
- Accurately track incident costs associated with assigned resources for cost recovery.

#### **RESPONDING STATE AGENCIES/ORGANIZATIONS REPORTS**

##### **Texas Division of Emergency Management (TDEM):**

On June 8, the State Operations Center (SOC) activated to Level II (Escalated Response) in support of the New World Screwworm incident. The SOC continues directing interagency coordination to maintain unified communication, deploy necessary resources, and support response operations in affected regions across Texas.

TDEM Regional staff continue to remain engaged with local officials across impacted areas as well as areas that have not experienced cases.

Coordination between local, state, federal, industry, and private-sector partners remains ongoing.

##### **Texas Animal Health Commission (TAHC):**

NWS Statistics

as of [8/14/26](#) at 2:00 pm:

Total Confirmed Cases in Texas: 44

| Counties affected | Total positive cases | Species affected     |
|-------------------|----------------------|----------------------|
| Terrell           | 1                    | sheep                |
| Brewster          | 2                    | cattle               |
| Counties affected | Total inactive cases | Species affected     |
| Zavala            | 3                    | cattle               |
| Sutton            | 3                    | sheep, canine, goat  |
| La Salle          | 2                    | cattle               |
| Gillespie         | 1                    | goats                |
| Pecos             | 4                    | canine, sheep        |
| Crockett          | 11                   | sheep, cattle, goats |
| Edwards           | 5                    | cattle, goats, sheep |
| Tom Green         | 1                    | cattle               |
| Terrell           | 4                    | cattle, goats        |
| Medina            | 1                    | cattle               |
| Jim Hogg          | 1                    | cattle               |
| Schleicher        | 1                    | sheep                |
| Uvalde            | 1                    | cattle               |
| Brewster          | 2                    | cattle               |
| Starr             | 1                    | cattle               |

#### NWS Certified Inspector Program Statistics

*As of 8/14/26 at 2:00 PM*

|                        |     |
|------------------------|-----|
| Application in Process | 2   |
| Certified Inspectors   | 822 |

*\*TAHC expanded eligible applicants to include emergency management personnel. As the program rolls out, TAHC is evaluating expansion of the program to additional groups*

#### **Mission Information and Details**

- To date, TAHC has inspected 42,440 animals in the infested zones, and 1,591 certificates have been issued for movement out of the infested zones.
- TAHC inspectors have been mobilized to conduct animal inspection/movement/outreach within the identified infested and adjacent zones. These groups will conduct inspections of livestock to identify myiasis, assist producers with topical/systemic treatments, and collect larval samples for official laboratory identification. Additionally, they will perform pre-movement inspections, ensure proper treatment compliance, and issue official NWS movement certificates as quickly as possible.

- On [August 13](#), a total of [14](#) inspections were completed on [307](#) animals moving out of the infested zones.
- TAHC compliance and checkpoint strike teams are operating roadside checkpoints. Roadside checkpoints have been established within the infested and adjacent zones to ensure NWS guideline compliance.
  - On [August 13](#), a total of [16](#) educational outreach visits and [19](#) NWS compliance verifications were completed at checkpoint locations.
- Livestock Market inspections are being conducted to screen livestock for signs of myiasis and verify that all animals entering a market from an Infested Zone possess a valid NWS movement certificate. Animals moving to slaughter are monitored to ensure they enter proper slaughter channels, and any changes to a non-slaughter status are confirmed to receive immediate treatment at the market.
- TAHC Regional Staff are working with local producers in the region to answer questions and assist with the coordination of local jurisdictions and assets.
- NWS Identification Specialists, located at the NVSL Mobile Lab and USDA Agricultural Research Service (ARS) Lab, are screening suspect larval and fly submissions from the infested and adjacent zones for rapid identification. One (1) TAHC entomologist has been assigned to the mobile laboratory to assist.
- Providing information, outreach, and education to industry, animal owners, stakeholders, and the public about NWS to encourage surveillance and proper reporting.
- The [TAHC New World screwworm webpage](#) is updated regularly to provide information and resources, as it becomes available.
- Field personnel are equipped with outreach materials for distribution during response activities.
- In collaboration with Texas A&M AgriLife Extension Service, TAHC is providing animal owners and producers, veterinarians, NWS Certified Inspectors, and other stakeholders with a quick-reference resource outlining current animal movement requirements related to NWS. This platform contains content to facilitate TAHC-compliant animal movement and is designed to simplify the identification of the correct movement requirements for various situations.

The situation is evolving, and new information will be provided as investigations continue.

Executive Director Orders identifying Infested Zones remain in effect, pursuant to Texas Agriculture Code, Chapters 161 – 168, and applicable regulations found in Title 4 of the Texas Administrative Code, Part 2, Chapters 31-60. This order remains in effect until the quarantine is released by the Commission.

### **Texas Parks and Wildlife Department (TPWD):**

To protect the State's natural resources, including fish and wildlife, through land-based and marine patrol, TPWD will serve as a force multiplier responding to requests for support from our federal, state, and local partners to prevent, detect, control, or

eradicate parasitic disease outbreaks. TPWD will deploy coordinated resources to prevent, detect, control, and eradicate parasitic disease within the Texas-Mexico Border region.

TPWD staff will continue to coordinate native wildlife surveillance efforts, which will include:

- Working with landowners to organize active wildlife surveillance on their properties
- Inspection of hunter-harvested carcasses when necessary, including animals harvested in State Parks and Wildlife Management Areas.
- Inspection of recently road-killed wildlife.
- Inspection of animals is handled as part of routine wildlife handling, whether that is by agencies, researchers, or other entities that encounter wildlife regularly.
- Reporting from wildlife rehabbers, private practice vets, law enforcement, taxidermists, game processors, and the public.

As of August 14

- To date, TPWD staff have contacted 7,615 TPWD cooperators and permit holders to notify them of the NWS situation and promote surveillance.
- TPWD staff have secured an accumulated total of 272 locations for NWS traps for the USDA and TAHC.
- TPWD staff have investigated 6,543 animals statewide and investigated 55 suspect cases.
- TPWD staff are monitoring 456 game cameras in 38 Wildlife Management Areas.
- Since NWS was detected in Texas, TPWD staff have presented on NWS at 54 workshops totaling approximately 5,361 attendees.
- TPWD Wildlife Division currently has 117 staff that have completed the AgriLife NWS training.

### **Texas A&M AgriLife Extension Service (AgriLife):**

Currently, the AgriLife Extension SOC liaison, Public Information Officer (PIO), Disaster Assessment and Recovery (DAR) Team Members, DAR Administration, Extension Administration, and County Extension Agents are monitoring NWS movement and conditions, SOC response activity, and participating in weekly communication calls with Extension Administration, Entomologists, and Livestock Specialists. Disaster Assessment and Recovery Specialists are on standby to support County Extension Agents and ESF-11 partners with public education, animal response, and recovery efforts as requested. PIO continues to develop educational and outreach materials for publication and continues to participate in daily Joint Information Center activities.

Since June 2025, leading up to the first confirmed NWS case in Texas, AgriLife has:

- Conducted educational programs on NWS reaching over 21,200 participants.

- Established an 18-member working group of Extension Specialists across livestock, wildlife, and human disciplines focused on the development of educational information, outreach techniques, and resources for use by County Extension Agents and other appropriate Extension personnel across Texas.
- Developed a County Extension NWS Educational Toolkit, complete with videos and PowerPoint Slide Decks for use in local producer and community educational outreach efforts.
- Through a grant from USDA-APHIS, Texas A&M AgriLife Extension has distributed 1,000 NWS larva collection kits among the Southern and Western County Extension offices for use in NWS detection and identification.
- Provided expertise with local and state government representatives to better inform their preparation should an incident occur.
- Texas A&M AgriLife Extension livestock entomology specialist conducted an NWS awareness training during the monthly meeting of the Extension Disaster Education Network (EDEN) Agricultural Committee, as well as more in-depth training during the May 2026 EDEN webinar hosted by the EDEN professional development committee.
- The Ag Alert pest and disease alert system has seen a 600% increase in subscribers since the first detection of NWS on June 3. As of July 13, there were 1,698 subscribers. NWS cases are being posted on the site, along with other animal and plant pest and disease cases.
- As of July 13, 2026, the following online printable resources are now available through the AgriLife Extension New World screwworm hub:
  - The AgriLife Extension pocket guide is available as a printable resource on the AgriLife website. The pocket guide provides basic information about New World screwworm, available treatment options, and general resources for Texans.
  - A Field Guide for Beef Cattle Producers provides early detection information, reporting, sample collection, submission, and treatment information. This resource is also available on the AgriLife Extension NWS hub.

Texas A&M AgriLife Research has completed its study evaluating ivermectin medicated feed products for white-tailed deer as a potential New World screwworm control measure. Data was submitted to the FDA on July 31, 2026 and is under review. The next trial will test doramectin, the active ingredient in Dectomax, in the medicated feed and is expected to begin in the coming weeks.

As of August 14

- The New World Screwworm Preparedness and Response Education Course for Livestock Inspection remains available on the AgriLife Learn website. As of 8:30 am August 13, 6,331 individuals had enrolled, with 3,167 completing the modules and earning completion certificates.

- Two USDA and TAHC Sample Submission Guidance Documents were sent to Extension Administration for distribution to county Extension offices to ensure proper NWS sample submission occurs to testing laboratories.

As of August 12

- Texas Animal Health Commission requested the AgriLife DAR Unit for one DAR Specialist to fill a Livestock Investigation Compliance Officer position in the San Angelo area. The DAR Specialist deployed August 9 to assist with livestock checkpoints will demobilize August 16, 2026.

### **Texas A&M Veterinary Medical Diagnostic Laboratory (TVMDL):**

The Texas A&M Veterinary Medical Diagnostic Laboratory (TVMDL) has deployed one laboratory professional to the Texas Animal Health Commission's (TAHC) Pleasanton office to join the United States Department of Agriculture mobile detection unit deployed from USDA's National Veterinary Services Laboratory (NVSL). The lab is now operational and accepting samples for identification. A second professional remains stationed in the State Operations Center (SOC) in Austin.

TVMDL is educating clients to contact TAHC for triage of a suspected fly or larvae instead of direct submission to TVMDL. However, TVMDL Client Services staff review every daily submission and flag any cases submitted for fly/larvae ID. Laboratorians who have passed the USDA proficiency test for NWS identification stand ready to review submissions and will immediately contact TAHC and USDA should a suspect case be identified. Suspect samples will be routed as directed by TAHC and USDA. Staff participate in the TAHC Virtual Joint Information Center daily calls.

Laboratory personnel at all four agency locations are on standby to support ESF-11 partners as needed.

TVMDL veterinarians are assisting the Texas A&M AgriLife Extension Service in producing screwworm collection kits.

TVMDL is working to validate high-throughput testing, should the need arise.

As of August 13

TVMDL received 3 submissions from USDA traps on August 13, 2026. TVMDL did not receive any submissions from private citizens. No submissions were received by the NVSL mobile lab on August 13, 2026. In total, 3 submissions were received by TVMDL College Station on August 13, 2026.

### **Texas Department of State Health Services (DSHS):**

DSHS State Medical Operations Center (SMOC) is at Increased Readiness in support of this incident. DSHS continues working with state partners and lead agencies to

ensure ESF-8's ongoing support.

DSHS is prepared to support, as needed, to assist in protecting the Texas livestock industry and wildlife. DSHS is ready to respond to human cases, should that occur.

#### August 14 – Ongoing Coordination

- Center for Health Emergency Preparedness and Response (CHEPR)
  - Sunday, August 16 DSHS will rotate [2] inspectors. One in Tom Green County, and one in Crockett County.

DSHS staff across regional offices continue reaching out to partners to ensure animal control officers, veterinarians, local health departments, county judges, tribal nations, and other regional partners have the latest guidance and resources for identification, sampling, and reporting NWS.

#### **Texas Department of Agriculture (TDA):**

The Texas Department of Agriculture continues to conduct surveillance, gather intelligence, collect evidence, and monitor any signs of the New World Screwworm fly in relevant portions of the state. Traps specific for the New World Screwworm have been deployed and are continually monitored, with all suspect samples sent to our state and federal partners for identification of suspect fly species.

#### **Texas Commission on Environmental Quality (TCEQ):**

TCEQ continues to closely monitor the NWS response and will coordinate with state and federal partners to provide technical assistance and guidance on carcass disposal.

#### **Texas Department of Transportation (TxDOT):**

TxDOT continues to support the State Operations Center through daily coordination and situational awareness activities. The department is coordinating with TAHC on compliance checkpoint locations as the New World Screwworm response expands, providing affected districts with operational updates. TxDOT Emergency Management personnel also distribute daily response information and educational materials statewide to maintain awareness and support coordinated operations.

#### **Texas Military Department (TMD):**

The Texas Military Department (TMD) is supporting state agency partners in response with a SOC support team. TMD has activated an Aerial Dispersal Team in South Texas to assist partners with sterile fly dispersal.

**Texas Cyber Command (TXCC):**

TXCC has demobilized effective August 14<sup>th</sup>.

**Texas Department of Public Safety (DPS):**

As DPS continues to support NWS response, the updated checkpoints for La Salle, Edwards, Gillespie, Tom Green, Crockett, Medina, Jim Hogg, Brewster, and Starr Counties have been distributed to DPS field personnel. THP personnel continue to patrol the affected areas identified by TAHC. THP is available to respond to assistance requests.

**Texas A&M Veterinary Emergency Team (VET):**

On June 18, VET returned from an assigned status in the field to an available status from home stations and remains available on an as-needed basis.

**Texas A&M Forest Service (TAMFS):**

TAMFS is providing agency personnel to assist TAHC as checkpoint investigators in the screwworm-infected zones. [The PIO was released August 14<sup>th</sup>.](#)

**FINAL COMMENTS:** The State Operations Center (SOC) is currently operating at Level II (Escalated Response Conditions). The Texas Division of Emergency Management (TDEM) continues to monitor the situation and will provide additional situation reports as needed.

**The four levels of SOC activation are:**

- Level I (Emergency Conditions)
- Level II (Escalated Response Conditions)
- Level III (Increased Readiness Conditions)
- Level IV (Normal Conditions)

*This Situation Report can be found on the TDEM webpage at:*
