FEMA Region 6 Weather Threat Briefing

Sunday, October 25, 2026

Disclaimer: The purpose of this briefing is to provide a **Regional** weather threat assessment and is meant as a general overview. County/Parish decision makers should consult their local NWS forecast offices for the latest detailed, local weather information. To find your local NWS forecast office, go to www.weather.gov/srh.

National Oceanic and
Atmospheric Administration
U.S. Department of Commerce

National Weather Service
Sector 2 - Texas, Gulf Coast, and Puerto Rico

Summary

- **River Flooding:**
 - Moderate river flooding today at Rio Chama near Chamita. Expected to fall out of moderate flood stage later this morning.
 - Properties along the Rio Chama and southern reach of the Rio Ojo Caliente are flooded. Private roadways within several hundred yards of the river are impassable.
 - San Juan River at Farmington is expected to go under Minor flood stage later this morning. However, live gage data may not be available.
- **Flash Flooding:**
 - Slight risk (level 2 of 4) today S-NE NM, TX/OK Panhandles, Far W TX.
 - Rain rates generally up to 1-2" per hr & storm totals widespread 1-3" with pockets of 4-6".
 - Pacific moisture may ramp back up on Thursday, leading to flash flooding concerns in S/C TX, as well as portions of S NM.
- **Severe Weather:**
 - Marginal risk (level 1 of 5) today in C/E NM, Far W TX, and the TX/OK Panhandles. Hail and wind are the main threat. Low risk of tornadoes.
- **Tropical:**
 - No tropical impacts are expected over the 7 days.

FEMA Region 6 Threat Matrix

Next 7 days

	Sunday, Oct 25	Monday, Oct 26	Tuesday, Oct 27	Wednesday, Oct 28	Thursday, Oct 29	Friday, Oct 30	Saturday, Oct 31
Severe Storms	C/E NM, Far W TX, TX/OK Panhandles						
Heavy Rain / Flash Flooding	S-NE NM, TX/OK Panhandles, Far W TX	SE NM, W TX, TX/OK Panhandles, W OK			S/C TX	TX	
Fire Weather							
Tropical							
River Flooding	NM	NM					

Threat levels are based on FEMA Region 6 criteria. State or local threat level criteria may differ.
For more details on the colors in the threat matrix refer to the last slide in this briefing.

Risk Levels	Little to None	Minor	Moderate	Major	Extreme
-------------	----------------	-------	----------	-------	---------

Current Radar/Hazards

**Flood watch in NW NM through 1 AM CDT
Monday.**

**Flood watch in S/C NM, Far W TX through 7
AM CDT this morning.**

Tropical Weather Outlook – Atlantic/Gulf

Areas of Possible Development

Area	Chance of Development	Potential Impacts to FEMA 6
		None

Active Tropical Cyclones

Storm	Potential Impacts to FEMA 6
-------	-----------------------------

See <http://www.hurricanes.gov> for the latest on the tropics or any active storms

5-Day Precipitation Forecast & River Flood Status

Note: Even though the image displays 5 days of forecasted rainfall, river forecasts only include 1-2 days of rainfall

- **Moderate river flooding today at Rio Chama near Chamita. Expected to fall out of moderate flood stage later this morning.**
- Properties along the Rio Chama and southern reach of the Rio Ojo Caliente are flooded. Private roadways within several hundred yards of the river are impassable.**
- **San Juan River at Farmington is expected to go under Minor flood stage later this morning. However, live gage data may not be available.**

Note: Numerical levels (e.g. level 1 of 4) will not be assigned to riverine flooding due to the varying levels of impacts across flood categories.

Weather “Threat” Matrix for FEMA Region VI

Color	Definition	Criteria	Example(s)
Green	Little to None Safety: Rarely a Direct Threat to Life and Property Impact Potential: Typically Results in Little Inconvenience to Daily Routines	Severe: Marginal Risk from SPC Flooding: Minor flooding expected over localized areas Tropical: None Fire Weather: No Watches/Warnings, fuel moisture above 10% or green up active	<ul style="list-style-type: none"> Thunderstorms expected over LA this afternoon; a few may produce winds to knock down a few trees Something that happens almost every day in a particular season such as seabreeze storms in coastal TX
Yellow	Minor Safety: Rarely a Direct Threat to Life and Property Impact Potential: Typically Results in Some Inconvenience to Daily Life	Severe: Slight Risk from SPC Flooding: Nuisance flooded expected for a widespread area, or Minor flooding expected over isolated areas Tropical: A weak tropical wave expected to move towards or near any coastline Fire Weather: Red Flag Watches/Warnings and/or SPC outlines enhanced or critical fire outlook	<ul style="list-style-type: none"> 2-3 inches of rainfall expected over central AR today and tonight; some minor (brief) street flooding possible Scattered severe storms possible, one or two tornadoes expected, along with reports of strong winds/wind damage and ~1” hail
Orange	Moderate Safety: Often Threatening to Life and Property, Some Damage Unavoidable Impact Potential: Typically Results in Minor Disruption to Daily Life	Severe: Enhanced Risk from SPC Flooding: Minor flooding expected over a widespread area (including urban locations), or Moderate flooding expected over isolated areas Tropical: A Tropical Storm expected to move towards or near any coastline Fire: Critical fire outlook for more than 2 consecutive days, Warnings for 2 or more consecutive days, D3-D4 drought conditions	<ul style="list-style-type: none"> A snow/sleet mix is expected to move through or near the DFW area tomorrow morning; travel impacts likely Numerous severe storms possible, a few tornadoes possible along with several reports of wind damage along with damaging hail Some large fires reported, burn bans advertised, critical conditions expected
Red	Major Safety: Extensive Property Damage Likely, Life Saving Actions Also will be Needed Impact Potential: Will likely result in Large Disruption to Daily Life	Severe: Moderate Risk from SPC Flooding: Moderate flooding expected over a widespread area (including urban locations) Tropical: A Hurricane expected to move towards or near any coastline Fire: Large areas of critical conditions for 2 or more days, Warnings for 3 or more days, Severe to extreme drought	<ul style="list-style-type: none"> A Category 1 hurricane will be moving towards the NW Gulf in the next few days Widespread severe storms likely, strong tornadoes, widespread wind damage, and destructive hail Large fires ongoing throughout the area with critical fire weather conditions expected to continue
Purple	Extreme Safety: Property Damage Unavoidable, Immediate Action to Save Life will be Needed Impact Potential: Typically Results in Long-Lived Widespread Major Disruption to Daily Life	Severe: High Risk from SPC Flooding: Major flooding expected over a widespread area (including urban locations) Tropical: A Major Hurricane (Cat3 or greater) expected to move towards or near any coastline Fire: Large area of critical conditions for 2 or more days, Warnings for 3 or more days, Long term (months) of severe to extreme drought	<ul style="list-style-type: none"> A Category 4 hurricane is headed towards the SE LA; major storm surge, flooding and damaging winds anticipated to begin tomorrow Widespread severe storms expected, tornado outbreak probable with long-lived, very widespread and particularly intense storms

Criteria for the color codes in this briefing is to the left, please provide any feedback to nws.soc2@noaa.gov
