National Weather Service | Amarillo

Follow Us: @NWSAmarillo

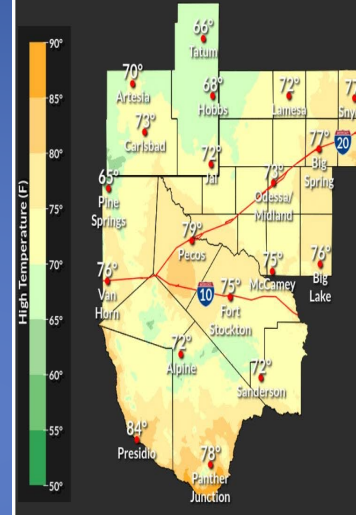

Medium chances for total rainfall reaching or exceeding 2 inches remain focused across the western and especially northwestern Panhandles through Monday morning. Multiple rounds of rain with heavy downpours are possible, so we will monitor the potential for flash flooding closely. If you have outdoor plans this weekend, please plan accordingly and stay tuned for forecast updates.

Scattered Showers and Storms Today

weather.gov/Midland
Updated: Sun Oct 25, 2026 3:44 AM

Today's Highs

Today's Rain Chances

Key Points

- Isolated to scattered showers/storms develop again this afternoon and evening. Storm coverage will be less overall than yesterday evening.
- Best chances (30-50%) will be across SE New Mexico and far west Texas. A couple of storms may become strong, and heavy rain may lead to localized flash flooding.
- Highs top out in the upper 60s and low-to-mid 70s areawide.

Follow: X @NWSMidland

NATIONAL WEATHER SERVICE MIDLAND/ODESSA, TX

Isolated to scattered shower and thunderstorm development is expected once again this afternoon and evening, mainly in SE New Mexico and in far west Texas. Coverage will be less overall than yesterday evening thanks in part to continued cloud cover. A storm or two may become strong to severe, and heavy rainfall could lead to very localized flash flooding.
