Chance of Flooding within 25 Miles

HEAVY
RAIN
up to 1"/hr

Flooding

Timing
**Most Likely:
Now through
Saturday Morning**

Information & Preparedness

- A low probability flood risk is present for a majority of the Panhandles today.
- Flash flood risk is most likely in areas that see prolonged moderate to heavy rain, urban areas, and those that received copious rainfall last week.
- Rain may occur past sunset, resulting in night time flooding. Turn around, don't drown!

National Weather Service | Amarillo

Follow Us: @NWSAmarillo

A marginal risk of excessive rainfall remains in place across the majority of the southeastern Panhandles today. Showers with embedded thunderstorms are expected to produce heavy rainfall, especially across the southeast. Prolonged activity, especially after all the rainfall we have seen, can easily lead to flooding. Make sure to be prepared.

Hazardous Weather

Flood Watch

In effect through Friday evening

The Rolling Plains, the far southeast Texas Panhandle, and portions of the South Plains

Additional rainfall of up to 1" during the day on Friday

IMPACTS

URBAN-STREET FLOODING

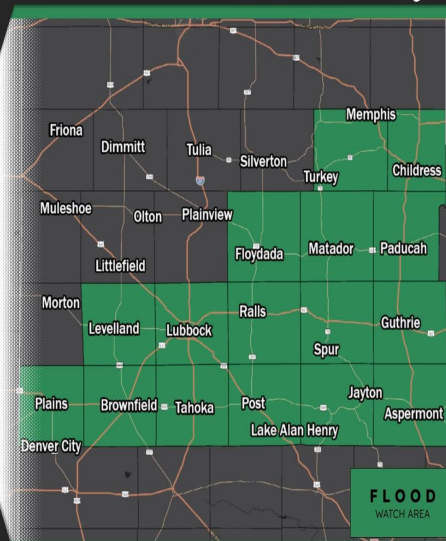

HEAVY RAIN

FLASH FLOODING

Turn Around. Don't Drown.

Updated: Fri Oct 30, 2026 7:42 AM

NATIONAL WEATHER SERVICE
LUBBOCK, TEXAS

Follow: @NWSLubbock

Continued rain through the day on Friday may lead to areas of flooding, mainly across the Rolling Plains, portions of the South Plains, and the far southeast Texas Panhandle. Additional rainfall amounts of up to 1" are possible.

Flood Watch

Through Friday Afternoon

West Texas and southeastern New Mexico

Rainfall amounts of 1 to 3 inches, with 3+ inches possible where heavier bands could produce higher amounts

IMPACTS:

URBAN-STREET FLOODING

HEAVY RAIN

FLASH FLOODING

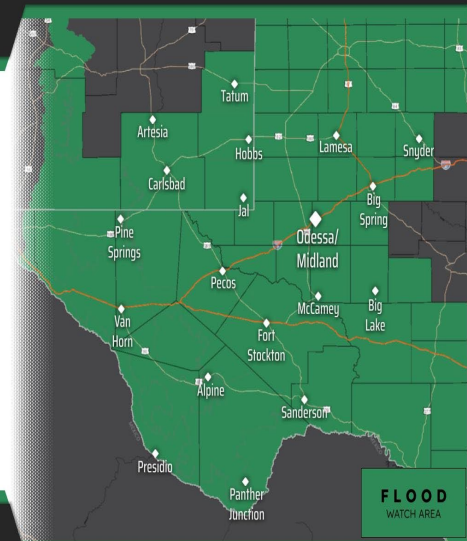

What to Do:

Prepare for heavy rain that could produce flooding and flash flooding

Drive carefully as wet roads could lead to hydroplaning

Turn around. Don't drown.
